

CCA AGGRESSIVE RETURN FUND

Institutional Class Shares
Ticker: RSKIX

STATEMENT OF ADDITIONAL INFORMATION

March 29, 2019

This Statement of Additional Information ("SAI") is not a prospectus. It should be read in conjunction with the Prospectus for the CCA Aggressive Return Fund (the "Fund") dated March 29, 2019. The Fund was reorganized on October 16, 2017 from the CCA Aggressive Return Fund (the "Predecessor Fund"), then a series of the CCA Investments Trust, as and into a series of MSS Series Trust. The Fund is a continuation of the Predecessor Fund and, therefore, certain information presented is that of the Predecessor Fund. The Fund's Prospectus is incorporated herein by reference into this SAI (i.e., legally made a part of this SAI). Copies of the Prospectus can be obtained at no charge by writing the transfer agent, Mutual Shareholder Services, LLC, 8000 Town Centre Road, Suite 400, Broadview Heights, Ohio 44147-4003, or by calling 1-800-595-4866 or by visiting www.ccafunds.com.

DESCRIPTION OF THE TRUST AND THE FUND

The Fund, as the Predecessor Fund, was organized as a diversified series of CCA Investments Trust on September 6, 2012 and commenced operations on December 26, 2012. On October 16, 2017 the Fund was reorganized into the MSS Series Trust. The Trust is an open-end investment company established under the laws of Ohio by an Agreement and Declaration of Trust (the "Trust Agreement"). The Trust Agreement permits the Board of Trustees to authorize and issue an unlimited number of shares of beneficial interest of separate series without par value. The Fund is one of a number of series currently authorized by the Trustees. The Fund is a diversified fund; this is a fundamental policy and will not be changed without the affirmative vote of a majority of the outstanding shares of the Fund. The investment adviser to the Fund is Checchi Capital Advisers, LLC ("CCA" or "Adviser").

The Fund does not issue share certificates. All shares are held in non-certificated form registered on the books of the Fund and the transfer agent for the account of the shareholder. The Fund currently offers one class of shares - Institutional Class shares. Each share of a series represents an equal proportionate interest in the assets and liabilities belonging to that series with each other share of that series and is entitled to such dividends and distributions out of income belonging to the series as are declared by the Trustees. The shares do not have cumulative voting rights or any preemptive or conversion rights, and the Trustees have the authority from time to time to divide or combine the shares of any series into a greater or lesser number of shares of that series so long as the proportionate beneficial interest in the assets belonging to that series and the rights of shares of any other series are in no way affected. In case of any liquidation of a series, the holders of shares of the series being liquidated will be entitled to receive as a class a distribution out of the assets, net of the liabilities, belonging to that series. Expenses attributable to any series are borne by that series. Any general expenses of the Trust not readily identifiable as belonging to a particular series are allocated by or under the direction of the Trustees in such manner as the Trustees determine to be fair and equitable. No shareholder is liable to further calls or to assessment by the Trust without his or her express consent.

Any Trustee of the Trust may be removed by vote of the shareholders holding not less than two-thirds of the shares then outstanding, cast in person or by proxy at any meeting called for that purpose, or by a declaration in writing signed by shareholders holding not less than two-thirds of the shares then outstanding. The Trust does not hold an annual meeting of shareholders. When matters are submitted to shareholders for a vote, each shareholder is entitled to one vote for each whole share owned by the shareholder and fractional votes for fractional shares owned by the shareholder. All shares of the Fund have equal voting rights and liquidation rights. The Agreement and Declaration of Trust can be amended by the Trustees, except that any amendment that adversely affects the rights of shareholders must be approved by the shareholders affected. All shares of a fund are subject to involuntary redemption if the Trustees determine to liquidate the fund. An involuntary redemption will create a capital gain or a capital loss, which may have tax consequences about which you should consult your tax adviser.

For information concerning the purchase and redemption of shares of the Fund, see "How to Purchase Shares" and "How to Redeem Shares" in the Prospectus. For a description of the methods used to determine the share price and value of the Fund's assets, see "How to Purchase Shares" and "How Shares are Priced" in the Prospectus and "Pricing of Shares" in this Statement of Additional Information.

ADDITIONAL INFORMATION ABOUT THE FUND'S INVESTMENTS AND RISKS

Investment Strategies and Risks

All principal investment strategies and risks are discussed in the Prospectus. This section contains a more detailed discussion of some of the investments the Fund may make and some of the techniques the Fund may use, as part of the Fund's principal investment strategies described in the risk/return summary in the Prospectus. Additional non-principal strategies and risks are also discussed below.

Certificates of Deposit and Bankers' Acceptances

Certificates of deposit are receipts issued by a depository institution in exchange for the deposit of funds. The issuer agrees to pay the amount deposited plus interest to the bearer of the receipt on the date specified on the certificate. The certificate usually can be traded in the secondary market prior to maturity. Bankers' acceptances typically arise from short-term credit arrangements designed to enable businesses to obtain funds to finance commercial transactions. Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then "accepted" by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an earning asset or it may be sold in the secondary market at the going rate of discount for a specific maturity. Although maturities for acceptances can be as long as 270 days, most acceptances have maturities of six months or less.

Closed-End Investment Companies

The Fund may invest in closed-end investment companies. Shares of closed-end funds are typically offered to the public in a one-time initial public offering by a group of underwriters who retain a spread or underwriting commission of between 4% or 6% of the initial public offering price. Such securities are then listed for trading on the New York Stock Exchange, the National Association of Securities Dealers Automated Quotation System (commonly known as "NASDAQ") and, in some cases, may be traded in other over-the-counter markets. Because the shares of closed-end funds cannot be redeemed upon demand to the issuer like the shares of an open-end investment company (such as the Fund), investors seek to buy and sell shares of closed-end funds in the secondary market.

The Fund generally will purchase shares of closed-end funds only in the secondary market. The Fund will incur normal brokerage costs on such purchases similar to the expenses the Fund would incur for the purchase of securities of any other

type of issuer in the secondary market. The Fund may, however, also purchase securities of a closed-end fund in an initial public offering when, in the opinion of the Adviser, based on a consideration of the nature of the closed-end fund's proposed investments, the prevailing market conditions and the level of demand for such securities, they represent an attractive opportunity for growth of capital. The initial offering price typically will include a dealer spread, which may be higher than the applicable brokerage cost if the Fund purchased such securities in the secondary market.

The shares of many closed-end funds, after their initial public offering, frequently trade at a price per share that is less than the net asset value per share, the difference representing the "market discount" of such shares. This market discount may be due in part to the investment objective of long-term appreciation, which is sought by many closed-end funds, as well as to the fact that the shares of closed-end funds are not redeemable by the holder upon demand to the issuer at the next determined net asset value, but rather, are subject to supply and demand in the secondary market. A relative lack of secondary market purchasers of closed-end fund shares also may contribute to such shares trading at a discount to their net asset value.

The Fund may invest in shares of closed-end funds that are trading at a discount to net asset value or at a premium to net asset value. There can be no assurance that the market discount on shares of any closed-end fund purchased by the Fund will ever decrease. In fact, it is possible that this market discount may increase and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the net asset value of a Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund.

Closed-end funds may issue senior securities (including preferred stock and debt obligations) for the purpose of leveraging the closed-end fund's common shares in an attempt to enhance the current return to such closed-end fund's common shareholders. The Fund's investment in the common shares of closed-end funds that are financially leveraged may create an opportunity for greater total return on its investment, but at the same time may be expected to exhibit more volatility in market price and net asset value than an investment in shares of investment companies without a leveraged capital structure.

Commercial Paper

The Fund may purchase commercial paper. Commercial paper consists of short-term (usually from 1 to 270 days) unsecured promissory notes issued by corporations in order to finance current operations.

Convertible Securities

Convertible securities include fixed income securities that may be exchanged or converted into a predetermined number of shares of the issuer's underlying common stock at the option of the holder during a specified period. Convertible securities may take the form of convertible preferred stock, convertible bonds or debentures, units consisting of "usable" bonds and warrants or a combination of the features of several of these securities. Convertible securities are senior to common stocks in an issuer's capital structure, but are usually subordinated to similar non-convertible securities. While providing a fixed-income stream (generally higher in yield than the income derivable from common stock but lower than that afforded by a similar nonconvertible security), a convertible security also gives an investor the opportunity, through its conversion feature, to participate in the capital appreciation of the issuing company depending upon a market price advance in the convertible security's underlying common stock.

Corporate Debt

Corporate debt securities are long and short-term debt obligations issued by companies (such as publicly issued and privately placed bonds, notes and commercial paper). The Adviser considers corporate debt securities to be of investment grade quality if they are rated BBB- or higher by S&P or Baa3 or higher by Moody's, or if unrated, determined by the Adviser to be of comparable quality. Investment grade debt securities generally have adequate to strong protection of principal and interest payments. In the lower end of this category, adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal than in higher rated categories. The Fund may invest in both investment grade or below investment grade, secured and unsecured, corporate bonds. A secured bond is backed by collateral and an unsecured bond is not. Therefore an unsecured bond may have a lower recovery value than a secured bond in the event of a default by its issuer. The Adviser may incorrectly analyze the risks inherent in corporate bonds, such as the issuer's ability to meet interest and principal payments, resulting in a loss to the Fund.

Depositary Receipts

The Fund may purchase American Depositary Receipts ("ADRs"), European Depositary Receipts ("EDRs") and Global Depositary Receipts ("GDRs"). ADRs, EDRs and GDRs are certificates evidencing ownership of shares of a foreign issuer and are alternatives to directly purchasing the underlying foreign securities in their national markets and currencies. However, they continue to be subject to many of the risks associated with investing directly in foreign securities. These risks include the political and economic risks of the underlying issuer's country, as well as in the case of depositary receipts traded on non-U.S. markets, exchange risk. ADRs, EDRs and GDRs may be sponsored or unsponsored. The issuer of a sponsored receipt typically bears certain expenses of maintaining the depositary receipt facility. Unsponsored receipts are established without the participation of the issuer. Unsponsored receipts may involve higher expenses, they may not pass-through voting or other shareholder

rights, and they may be less liquid. Holders of unsponsored receipts generally bear all the costs of the depositary receipt facility. The bank or trust company depositary of an unsponsored depositary receipt may be under no obligation to distribute shareholder communications.

Equity Securities

Equity securities consist of common stock, convertible preferred stock, rights and warrants. Common stocks, the most familiar type, represent an equity (ownership) interest in a corporation. Warrants are options to purchase equity securities at a specified price for a specific time period. Rights are similar to warrants, but normally have a short duration and are distributed by the issuer to its shareholders. Although equity securities have a history of long term growth in value, their prices fluctuate based on changes in a company's financial condition and on overall market and economic conditions.

Investments in equity securities are subject to inherent market risks and fluctuations in value due to earnings, economic conditions and other factors beyond the control of the Adviser. As a result, the return and net asset value of the Fund will fluctuate. Securities in the Fund's portfolio may not increase as much as the market as a whole and some undervalued securities may continue to be undervalued for long periods of time. Although profits in some Fund holdings may be realized quickly, it is not expected that most investments will appreciate rapidly.

Exchange-Traded Funds

The Fund may invest in a range of exchange-traded funds ("ETFs"). ETFs may include, but are not limited to, Standard & Poor's Depositary Receipts ("SPDRs"), DIAMONDS,SM Nasdaq-100 Index Tracking Stock ("QQQs"), iShares, HOLDRs, Fidelity Select Portfolios, Select Sector SPDRs, Fortune e-50 and Fortune 50. Additionally, the Fund may invest in new exchange traded shares as they become available.

SPDRs represent ownership in the SPDR Trust, a unit investment trust that holds a portfolio of common stocks designed to closely track the price performance and dividend yield of the Standard & Poor's 500 Composite Stock Price IndexTM ("S&P 500 Index"). SPDRs trade on the New York Stock Exchange ("NYSE") under the symbol SPY. The value of SPDRs fluctuates in relation to changes in the value of the underlying portfolio of common stocks. A Mid Cap SPDR is similar to a SPDR except that it tracks the performance of the S&P Mid Cap 400 Index and trades on the NYSE under the symbol MDY. DIAMONDS represent an investment in the DIAMONDS Trust, a unit investment trust that serves as an index to the Dow Jones Industrial Average (the "Dow") in that its holding consists of the 30 component stocks of the Dow. The DIAMONDS Trust is structured so that its shares trade at approximately 1/100 (one one-hundredth) of the value of the Dow Index. The DIAMONDS Trust's shares trade on the AMEX under the symbol DIA. QQQs represent ownership in the Nasdaq-100 Trust, a unit investment trust that holds a portfolio of common stocks designed to track the price performance and dividend yield of the NASDAQ 100 Index by holding shares of all the companies on the Index. Shares trade on the AMEX under the symbol QQQ. The iShares are managed by Barclays Global Investors, N.A. ("Barclays"). They track 80

different indexes, including sector/industry indexes (such as the S&P Financial Sector Index), bond indexes (such as the Barclays U.S. Aggregate Index and the Barclays 1-3 Year Treasury Bond Index) and international indexes (such as the S&P Europe 500 Index). Each iShares international ETF represents a broad portfolio of publicly-traded stocks in a selected country. Each iShares international ETF seeks to generate investment results that generally correspond to the market yield performance of a given Morgan Stanley Capital International ("MSCI") Index. Barclays, the sole U.S. provider of fixed income ETFs, offers six iShares fixed income ETFs that track a particular Barclays bond index. ETFs (both stock and fixed income) are subject to all of the common stock risks, and the international iShares are subject to all of the foreign securities risks described above. Investments in SPDRs, DIAMONDS, QQQs and iShares are considered to be investments in investment companies, see "Investments in Other Investment Companies" below.

When the Fund invests in sector ETFs, there is a risk that securities within the same group of industries will decline in price due to sector-specific market or economic developments. If the Fund invests more heavily in a particular sector, the value of their respective shares may be especially sensitive to factors and economic risks that specifically affect that sector. As a result, the Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of industries. Additionally, some sectors could be subject to greater government regulation than other sectors. Therefore, changes in regulatory policies for those sectors may have a material effect on the value of securities issued by companies in those sectors. The sectors in which the Fund may be more heavily invested will vary.

The shares of an ETF may be assembled in a block (typically 50,000 shares) known as a creation unit and redeemed in-kind for a portfolio of the underlying securities (based on the ETF's net asset value) together with a cash payment generally equal to accumulated dividends as of the date of redemption. Conversely, a creation unit may be purchased from the ETF by depositing a specified portfolio of the ETF's underlying securities, as well as a cash payment generally equal to accumulated dividends of the securities (net of expenses) up to the time of deposit. A fund may redeem creation units for the underlying securities (and any applicable cash), and may assemble a portfolio of the underlying securities and use it (and any required cash) to purchase creation units, if a fund's adviser believes it is in the fund's interest to do so. A fund's ability to redeem creation units may be limited by the Investment Company Act of 1940, as amended (the "1940 Act"), which provides that the ETFs will not be obligated to redeem shares held by a fund in an amount exceeding one percent of their total outstanding securities during any period of less than 30 days.

There is a risk that the underlying ETFs in which the Fund invests may terminate due to extraordinary events that may cause any of the service providers to the ETFs, such as the trustee or sponsor, to close or otherwise fail to perform their obligations to the ETF. Also, because the ETFs in which the Fund intends to invest may be granted licenses by agreement to use the indices as a basis for determining their compositions and/or otherwise to use certain trade names, the ETFs may terminate if such license agreements are terminated. In addition, an ETF may terminate if its entire net asset value falls below a certain amount. Although the Fund believes that, in the event of the

termination of an underlying ETF the Fund will be able to invest instead in shares of an alternate ETF tracking the same market index or another market index with the same general market, there is no guarantee that shares of an alternate ETF would be available for investment at that time. To the extent the Fund invests in a sector product, the Fund will be subject to the risks associated with that sector.

Foreign Securities

The Fund intends to invest in foreign securities which may be traded in foreign securities markets or trading in domestic markets through an American Depositary Receipt (ADR) (as described above). Purchases of foreign equity securities entail certain risks. For example, there may be less information publicly-available about a foreign company than about a U.S. company, and foreign companies generally are not subject to accounting, auditing and financial reporting standards and practices comparable to those in the U.S. Other risks associated with investments in foreign securities include changes in restrictions on foreign currency transactions and rates of exchanges, changes in the administrations or economic and monetary policies of foreign governments, the imposition of exchange control regulations, the possibility of expropriation decrees and other adverse foreign governmental action, the imposition of foreign taxes, less liquid markets, less government supervision of exchanges, brokers and issuers, difficulty in enforcing contractual obligations, delays in settlement of securities transactions and greater price volatility. In addition, investing in foreign securities will generally result in higher commissions than investing in similar domestic securities.

Foreign Government Debt Securities

Investments in sovereign debt obligations involve special risks which are not present in corporate debt obligations. The foreign issuer of the sovereign debt or the foreign governmental authorities that control the repayment of the debt may be unable or unwilling to repay principal or interest when due, and the Fund may have limited recourse in the event of a default. During periods of economic uncertainty, the market prices of sovereign debt, and the net asset value of the Fund, to the extent it invests in such securities, may be more volatile than prices of U.S. debt issuers. In the past, certain foreign countries have encountered difficulties in servicing their debt obligations, withheld payments or principal and interest and declared moratoria on the payment of principal and interest of their sovereign debt. A sovereign debtor's willingness or ability to repay principal and pay interest in a timely manner may be affected by, among factors, its cash flow situation, the extent of its foreign currency reserves, the availability of sufficient foreign exchange, the relative size of the debt service burden, the sovereign debtor's policy toward principal international lenders and local political constraints. Sovereign debtors may also be dependent on expected disbursements from foreign governments, multilateral agencies and other entities to reduce principal and interest arrearages on their debt. The commitment on the part of these governments, agencies and others to make such disbursements may be conditioned on the implementation of economic reforms and/or economic performance and the timely service of such debtor's obligations. Failure to implement such reforms, achieve such levels of economic

performance or repay principal or interest when due may result in the cancellation of such third parties' commitments to lend funds to the governmental entity, which may further impair such debtor's ability or willingness to timely service its debts. Consequently, governmental entities may default on their sovereign debt.

Holders of sovereign debt may be requested to participate in the rescheduling of such debt and to extend further loans to governmental entities. In the event of a default by a governmental entity, there may be few or no effective legal remedies for collecting on such debt.

High Yield Securities

The Fund may invest in high yield securities. High yield, high risk bonds are securities that are generally rated below investment grade by the primary rating agencies (BB+ or lower by S&P and Ba1 or lower by Moody's). Other terms used to describe such securities include "lower rated bonds," "non-investment grade bonds," "below investment grade bonds," and "junk bonds." These securities are considered to be high-risk investments. The risks include the following:

Greater Risk of Loss. These securities are regarded as predominately speculative. There is a greater risk that issuers of lower rated securities will default than issuers of higher rated securities. Issuers of lower rated securities generally are less creditworthy and may be highly indebted, financially distressed, or bankrupt. These issuers are more vulnerable to real or perceived economic changes, political changes or adverse industry developments. In addition, high yield securities are frequently subordinated to the prior payment of senior indebtedness. If an issuer fails to pay principal or interest, the Fund would experience a decrease in income and a decline in the market value of its investments. The Fund also may incur additional expenses in seeking recovery from the issuer.

Sensitivity to Interest Rate and Economic Changes. The income and market value of lower-rated securities may fluctuate more than higher rated securities. Although non-investment grade securities tend to be less sensitive to interest rate changes than investment grade securities, non-investment grade securities are more sensitive to short-term corporate, economic and market developments. During periods of economic uncertainty and change, the market price of the investments in lower-rated securities may be volatile. The default rate for high yield bonds tends to be cyclical, with defaults rising in periods of economic downturn. For example, in 2000, 2001 and 2002, the default rate for high yield securities was significantly higher than in the prior or subsequent years.

Valuation Difficulties. It is often more difficult to value lower-rated securities than higher-rated securities. If an issuer's financial condition deteriorates, accurate financial and business information may be limited or unavailable. In addition, the lower-rated investments may be thinly traded and there may be no established secondary market. Because of the lack of market pricing and current information for investments in lower-rated securities, valuation of such investments is much more dependent on judgment than is the case with higher-rated securities.

Liquidity. There may be no established secondary or public market for investments in lower-rated securities. Such securities are frequently traded in markets that may be relatively less liquid than the market for higher rated securities. In addition, relatively few institutional purchasers may hold a major portion of an issue of lower-rated securities at times. As a result, the Fund may be required to sell investments at substantial losses or retain them indefinitely even where an issuer's financial condition is deteriorating.

Credit Quality. Credit quality of non-investment grade securities can change suddenly and unexpectedly, and even recently-issued credit ratings may not fully reflect the actual risks posed by a particular high-yield security.

New Legislation. Future legislation may have a possible negative impact on the market for high yield, high risk bonds. As an example, in the late 1980's, legislation required federally-insured savings and loan associations to divest their investments in high-yield, high-risk bonds. New legislation, if enacted, could have a material negative effect on the Fund's investments in lower-rated securities.

High-yield, high-risk investments may include the following:

Straight fixed-income debt securities. These include bonds and other debt obligations that bear a fixed or variable rate of interest payable at regular intervals and have a fixed or resettable maturity date. The particular terms of such securities vary and may include features such as call provisions and sinking funds.

Zero-coupon debt securities. These bear no interest obligation but are issued at a discount from their value at maturity. When held to maturity, their entire return equals the difference between their issue price and their maturity value.

Zero-fixed-coupon debt securities. These are zero-coupon debt securities that convert on a specified date to interest-bearing debt securities.

Pay-in-kind bonds. These are bonds which allow the issuer, at its option, to make current interest payments on the bonds either in cash or in additional bonds.

These are bonds sold without registration under the Securities Act of 1933, as amended ("Securities Act"), usually to a relatively small number of institutional investors.

Convertible Securities. These are bonds or preferred stock that may be converted to common stock.

Preferred Stock. These are stocks that generally pay a dividend at a specified rate and have preference over common stock in the payment of dividends and in liquidation.

Loan Participations and Assignments. These are participations in, or assignments of all or a portion of loans to corporations or to governments, including governments of less-developed countries.

Securities issued in connection with Reorganizations and Corporate Restructurings. In connection with reorganizing or restructuring of an issuer, an issuer may issue common stock or other securities to holders of its debt securities. The Fund may hold such common stock and other securities even if they do not invest in such securities.

Illiquid and Restricted Securities

The Fund may invest up to 15% of its net assets in illiquid securities, including limited partnerships. Illiquid securities include securities subject to contractual or legal restrictions on resale (e.g., because they have not been registered under the Securities Act) and securities that are otherwise not readily marketable (e.g., because trading in the security is suspended or because market makers do not exist or will not entertain bids or offers). Securities that have not been registered under the Securities Act are referred to as private placements or restricted securities and are purchased directly from the issuer or in the secondary market. Foreign securities that are freely-tradable in their principal markets are not considered to be illiquid.

Restricted and other illiquid securities may be subject to the potential for delays on resale and uncertainty in valuation. The Fund might be unable to dispose of illiquid securities promptly or at reasonable prices and might thereby experience difficulty in satisfying redemption requests from shareholders. The Fund might have to register restricted securities in order to dispose of them, resulting in additional expense and delay. Adverse market conditions could impede such a public offering of securities.

A large institutional market exists for certain securities that are not registered under the Securities Act, including foreign securities. The fact that there are contractual or legal restrictions on resale to the general public or to certain institutions may not be indicative of the liquidity of such investments. Rule 144A under the Securities Act allows such a broader institutional trading market for securities otherwise subject to restrictions on resale to the general public. Rule 144A establishes a "safe harbor" from the registration requirements of the Securities Act for resale of certain securities to qualified institutional buyers. Rule 144A has produced enhanced liquidity for many restricted securities, and market liquidity for such securities may continue to expand as a result of this regulation and the consequent existence of the PORTAL system, which is an automated system for the trading, clearance and settlement of unregistered securities of domestic and foreign issuers sponsored by the Financial Industry Regulatory Authority ("FINRA").

Under guidelines adopted by the Trust's Board, the Fund's adviser may determine that particular Rule 144A securities, and commercial paper issued in reliance on the private placement exemption from registration afforded by Section 4(a)(2) of the Securities Act, are liquid even though they are not registered. A determination of whether such a security is liquid or not is a question of fact. In making this

determination, the Adviser will consider, as it deems appropriate under the circumstances and among other factors: (i) the frequency of trades and quotes for the security; (ii) the number of dealers willing to purchase or sell the security; (iii) the number of other potential purchasers of the security; (iv) dealer undertakings to make a market in the security; (v) the nature of the security (e.g., debt or equity, date of maturity, terms of dividend or interest payments, and other material terms) and the nature of the marketplace trades (e.g., the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer); and (vi) the rating of the security and the financial condition and prospects of the issuer. In the case of commercial paper, the Adviser will also determine that the paper (a) is not traded flat or in default as to principal and interest, and (b) is rated in one of the two highest rating categories by at least two National Statistical Rating Organizations ("NRSRO") or, if only one NRSRO rates the security, by that NRSRO, or, if the security is unrated, the Adviser determines that it is of equivalent quality.

Rule 144A securities and Section 4(a)(2) commercial paper that have been deemed liquid as described above will continue to be monitored by the Adviser to determine if the security is no longer liquid as the result of changed conditions. Investing in Rule 144A securities or Section 4(a)(2) commercial paper could have the effect of increasing the amount of the Fund's assets invested in illiquid securities if institutional buyers are unwilling to purchase such securities.

Insured Bank Obligations

The Fund may invest in insured bank obligations. The Federal Deposit Insurance Corporation ("FDIC") insures the deposits of federally insured banks and savings and loan associations (collectively referred to as "banks") up to \$250,000. The Fund may purchase bank obligations which are fully insured as to principal by the FDIC. Currently, to remain fully insured as to principal, these investments must be limited to \$250,000 per bank, if the principal amount and accrued interest together exceed \$250,000, the excess principal and accrued interest will not be insured. Insured bank obligations may have limited marketability.

Leverage

The Fund may utilize leverage or invest in leveraged underlying funds. Borrowing magnifies the potential for gain or loss of a fund, and therefore increases the possibility of a fluctuation in the Fund's net asset value ("NAV"). This is the speculative factor known as leverage. Because the Fund's investments will fluctuate in value, whereas the interest obligations on borrowed funds may be fixed, during times of borrowing, the Fund's NAV may tend to increase more when its investments increase in value, and decrease more when its investments decrease in value. Unless profits on assets acquired with borrowed funds exceed the costs of borrowing, the use of borrowing will diminish the investment performance of a fund compared with what it would have been without borrowing.

Master Limited Partnerships

The Fund may invest in Master Limited Partnerships ("MLPs"). MLP investments will be focused in the energy sector. An investment in MLP units involves certain risks which differ from an investment in the securities of a corporation. Holders of MLP units have limited control and voting rights on matters affecting the partnership. In addition, there are certain tax risks associated with an investment in MLP units and conflicts of interest exist between common unit holders and the general partner, including those arising from incentive distribution payments. Additional risks include the following. A decrease in the production of natural gas, natural gas liquids, crude oil, coal or other energy commodities or a decrease in the volume of such commodities available for transportation, mining, processing, storage or distribution may adversely impact the financial performance of MLPs. To maintain or grow their revenues, these companies need to maintain or expand their reserves through exploration of new sources of supply, through the development of existing sources, through acquisitions, or through long-term contracts to acquire reserves. The financial performance of MLPs may be adversely affected if they, or the companies to whom they provide the service, are unable to cost-effectively acquire additional reserves sufficient to replace the natural decline. Various governmental authorities have the power to enforce compliance with regulations and the permits issued under them, and violators are subject to administrative, civil and criminal penalties, including civil fines, injunctions or both. Stricter laws, regulations or enforcement policies could be enacted in the future which would likely increase compliance costs and may adversely affect the financial performance of MLPs. Volatility of commodity prices, which may lead to a reduction in production or supply, may also negatively impact the performance of MLPs.

MLPs are also subject to risks that are specific to the industry they serve. MLPs that provide crude oil, refined product, natural gas liquids and natural gas services are subject to supply and demand fluctuations in the markets they serve which will be impacted by a wide range of factors, including fluctuating commodity prices, weather, increased conservation or use of alternative fuel sources, increased governmental or environmental regulation, depletion, rising interest rates, declines in domestic or foreign production, accidents or catastrophic events, and economic conditions, among others.

As a partnership, an MLP has no tax liability at the entity level. If, as a result of a change in current law or a change in an MLP's business, an MLP were treated as a corporation for federal income tax purposes, such an MLP would be obligated to pay federal income tax on its income at the corporate tax rate. If an MLP were classified as a corporation for federal income tax purposes, the amount of cash available for distribution by the MLP would be reduced and distributions received by investors would be taxed under federal income tax laws applicable to corporate dividends (as dividend income, return of capital, or capital gain). Therefore, treatment of an MLP as a corporation for federal income tax purposes would result in a reduction in the after-tax return to investors, as compared to an MLP that is not taxed as a corporation, likely causing a reduction in the value of the Fund's shares.

Mortgage Pass-Through Securities

Interests in pools of mortgage pass-through securities differ from other forms of debt securities (which normally provide periodic payments of interest in fixed amounts and the payment of principal in a lump sum at maturity or on specified call dates). Instead, mortgage pass-through securities provide monthly payments consisting of both interest and principal payments. In effect, these payments are a "pass-through" of the monthly payments made by the individual borrowers on the underlying residential mortgage loans, net of any fees paid to the issuer or guarantor of such securities. Unscheduled payments of principal may be made if the underlying mortgage loans are repaid or refinanced or the underlying properties are foreclosed, thereby shortening the securities' weighted average life. Some mortgage pass-through securities (such as securities guaranteed by Government National Mortgage Association ("GNMA")) are described as "modified pass-through securities." These securities entitle the holder to receive all interest and principal payments owed on the mortgage pool, net of certain fees, on the scheduled payment dates regardless of whether the mortgagor actually makes the payment.

The principal governmental guarantor of mortgage pass-through securities is GNMA. GNMA is authorized to guarantee, with the full faith and credit of the U.S. Treasury, the timely payment of principal and interest on securities issued by lending institutions approved by GNMA (such as savings and loan institutions, commercial banks and mortgage bankers) and backed by pools of mortgage loans. These mortgage loans are either insured by the Federal Housing Administration or guaranteed by the Veterans Administration. A "pool" or group of such mortgage loans is assembled and after being approved by GNMA, is offered to investors through securities dealers.

Government -related guarantors of mortgage pass-through securities (i.e., not backed by the full faith and credit of the U.S. Treasury) include the Federal National Mortgage Association ("FNMA") and the Federal Home Loan Mortgage Corporation ("FHLMC"). FNMA is a government-sponsored corporation owned entirely by private stockholders. It is subject to general regulation by the Secretary of Housing and Urban Development. FNMA purchases conventional (i.e., not insured or guaranteed by any government agency) residential mortgages from a list of approved sellers/servicers which include state and federally chartered savings and loan associations, mutual savings banks, commercial banks and credit unions and mortgage bankers. Mortgage pass-through securities issued by FNMA are guaranteed as to timely payment of principal and interest by FNMA but are not backed by the full faith and credit of the U.S. Treasury.

FHLMC was created by Congress in 1970 for the purpose of increasing the availability of mortgage credit for residential housing. It is a U.S. government-sponsored corporation formerly owned by the twelve Federal Home Loan Banks and now owned entirely by private stockholders. FHLMC issues Participation Certificates ("PCs"), which represent interests in conventional mortgages from FHLMC's national portfolio. FHLMC guarantees the timely payment of interest and ultimate collection of principal, but PCs are not backed by the full faith and credit of the U.S. Treasury.

Commercial banks, savings and loan institutions, private mortgage insurance companies, mortgage bankers and other secondary market issuers also create pass-through pools of conventional residential mortgage loans. Such issuers may, in addition, be the originators and/or servicers of the underlying mortgage loans as well as the guarantors of the mortgage pass-through securities. The Fund does not purchase interests in pools created by such non-governmental issuers.

Resets. The interest rates paid on the Adjustable Rate Mortgage Securities ("ARMs") in which the Fund may invest generally are readjusted or reset at intervals of one year or less to an increment over some predetermined interest rate index. There are two main categories of indices: those based on U.S. Treasury securities and those derived from a calculated measure, such as a cost of funds index or a moving average of mortgage rates. Commonly utilized indices include the one-year and five-year constant maturity Treasury Note rates, the three-month Treasury Bill rate, the 180-day Treasury Bill rate, rates on longer-term Treasury securities, the National Median Cost of Fund, the one-month or three-month London Interbank Offered Rate (LIBOR), the prime rate of a specific bank, or commercial paper rates. Some indices, such as the one-year constant maturity Treasury Note rate, closely mirror changes in market interest rate levels. Others tend to lag changes in market rate levels and tend to be somewhat less volatile.

Caps and Floors. The underlying mortgages which collateralize the ARMs in which the Fund may invest will frequently have caps and floors which limit the maximum amount by which the loan rate to the residential borrower may change up or down: (1) per reset or adjustment interval, and (2) over the life of the loan. Some residential mortgage loans restrict periodic adjustments by limiting changes in the borrower's monthly principal and interest payments rather than limiting interest rate changes. These payment caps may result in negative amortization. The value of mortgage securities in which the Fund may invest may be affected if market interest rates rise or fall faster and farther than the allowable caps or floors on the underlying residential mortgage loans. Additionally, even though the interest rates on the underlying residential mortgages are adjustable, amortization and prepayments may occur, thereby causing the effective maturities of the mortgage securities in which the Fund may invest to be shorter than the maturities stated in the underlying mortgages.

Municipal Securities

The Fund may invest in securities issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. Although the interest earned on many municipal securities is exempt from federal income tax, the Fund may invest in taxable municipal securities.

Municipal securities share the attributes of a debt/fixed income securities in general, but are generally issued by states, municipalities and other political subdivisions, agencies, authorities and instrumentalities of states and multi-state agencies or authorities. The municipal securities which the Portfolio may purchase

include general obligation bonds and limited obligation bonds (or revenue bonds), including industrial development bonds issued pursuant to former federal tax law. General obligation bonds are obligations involving the credit of an issuer possessing taxing power and are payable from such issuer's general revenues and not from any particular source. Limited obligation bonds are payable only from the revenues derived from a particular facility or class of facilities or, in some cases, from the proceeds of a special excise or other specific revenue source. Tax-exempt private activity bonds and industrial development bonds generally are also revenue bonds and thus are not payable from the issuer's general revenues. The credit and quality of private activity bonds and industrial development bonds are usually related to the credit of the corporate user of the facilities. Payment of interest on and repayment of principal of such bonds is the responsibility of the corporate user (and/or any guarantor).

Under the Internal Revenue Code of 1986, as amended (the "Internal Revenue Code"), certain limited obligation bonds are considered "private activity bonds" and interest paid on such bonds is treated as an item of tax preference for purposes of calculating federal alternative minimum tax liability.

Options

The Fund may utilize call and put options to attempt to protect against possible changes in the market value of securities held in or to be purchased for the Fund's portfolio and to generate income or gain for the Fund. Such options may relate to particular securities or stock indices, and may or may not be listed on a domestic or foreign securities exchange and may or may not be issued by the Options Clearing Corporation. Options trading is a highly specialized activity that entails greater than ordinary investment risk. Options may be more volatile than the underlying instruments, and therefore, on a percentage basis, an investment in options may be subject to greater fluctuation than an investment in the underlying instruments themselves. The ability of the Fund to successfully utilize options will depend on the adviser's ability to predict pertinent market movements, which cannot be assured. The Fund will comply with applicable regulatory requirements when implementing these techniques and instruments.

Stock index options are put options and call options on various stock indices. In most respects, they are identical to listed options on common stocks. The primary difference between stock options and index options occurs when index options are exercised. In the case of stock options, the underlying security, common stock, is delivered. However, upon the exercise of an index option, settlement does not occur by delivery of the securities comprising the index. The option holder who exercises the index option receives an amount of cash if the closing level of the stock index upon which the option is based is greater than, in the case of a call, or less than, in the case of a put, the exercise price of the option. This amount of cash is equal to the difference between the closing price of the stock index and the exercise price of the option expressed in dollars times a specified multiple. A stock index fluctuates with changes in the market value of the stocks included in the index.

The Fund may write (sell) covered call options and covered put options and purchase call and put options. The purpose of engaging in options transactions is to reduce the effect of price fluctuations of the securities owned by the Fund (and involved in the options) on the Fund's net asset value per share and to generate additional revenues.

A covered call option is an option sold on a security owned by the seller of the option in exchange for a premium. A call option gives the purchaser of the option the right to buy the underlying securities at the exercise price during the option period. If the option is exercised by the purchaser during the option period, the seller is required to deliver the underlying security against payment of the exercise price. The seller's obligation terminates upon expiration of the option period or when the seller executes a closing purchase transaction with respect to such option. Call options on securities which the Fund sells (writes) will be covered or secured, which means that the Fund will own the underlying security or, to the extent it does not hold such a security, will maintain a segregated account with the Fund's custodian consisting of liquid securities or liquid debt obligations equal to the market value of the option, marked to market daily. When the Fund writes a covered call option, it profits from the premium paid by the buyer but gives up the opportunity to profit from an increase in the value of the underlying security above the exercise price. At the same time, the seller retains the risk of loss from a decline in the value of the underlying security during the option period. Although the seller may terminate its obligation by executing a closing purchase transaction, the cost of effecting such a transaction may be greater than the premium received upon its sale, resulting in a loss to the seller. If such an option expires unexercised, the seller realizes a gain equal to the premium received. Such a gain may be offset or exceeded by a decline in the market value of the underlying security during the option period. If an option is exercised, the exercise price, the premium received and the market value of the underlying security determine the gain or loss realized by the seller.

When the Fund sells a covered put option, it has the obligation to buy, and the purchaser of the put the right to sell, the underlying security at the exercise price during the option period. To cover a put option, the Fund deposits cash or liquid securities in a segregated account at its custodian. The value of the deposited securities is equal to or greater than the exercise price of the underlying security. The value of the deposited securities is marked to market daily and, if necessary, additional assets are placed in the segregated account to maintain a value equal to or greater than the exercise price. The Fund maintains the segregated account so long as it is obligated as the seller. The obligation of the Fund is terminated when the purchaser exercises the put option, when the option expires or when a closing purchase transaction is effected by the Fund. The Fund's gain on the sale of a put option is limited to the premium received plus interest earned on its segregated account. The Fund's potential loss on a put option is determined by taking into consideration the exercise price of the option, the market price of the underlying security when the put is exercised, the premium received and the interest earned on its segregated account. Although the Fund risks a substantial loss if the price of the security on which it has sold a put option drops suddenly, it can protect itself against serious loss by entering into a closing purchase transaction. The degree of loss will depend upon the Fund's ability to detect the movement in the security's price and to execute a closing transaction at the appropriate time.

The Fund may write options on such portion of its portfolio as management determines is appropriate in seeking to attain the Fund's objective. The Fund will write options when management believes that a liquid secondary market will exist on a national securities exchange for options of the same series so that the Fund can effect a closing purchase transaction if it desires to close out its position. Consistent with the investment policies of the Fund, a closing purchase transaction will ordinarily be effected to realize a profit on an outstanding option, to prevent an underlying security from being called or to permit the sale of the underlying security. Effecting a closing purchase transaction will permit the Fund to write another option on the underlying security with either a different exercise price or expiration date or both.

The Fund may purchase put options to protect against declines in the market value of portfolio securities or to attempt to retain unrealized gains in the value of portfolio securities. Put options might also be purchased to facilitate the sale of portfolio securities. The Fund may purchase call options as a temporary substitute for the purchase of individual securities, which then could be purchased in orderly fashion. Upon the purchase of the securities, the Fund would normally terminate the call position. The purchase of both put and call options involves the risk of loss of all or part of the premium paid. If the price of the underlying security does not rise (in the case of a call) or drop (in the case of a put) by an amount at least equal to the premium paid for the option contract, the Fund will experience a loss on the option contract equal to the deficiency.

Preferred Stock

Preferred stocks are securities that have characteristics of both common stocks and corporate bonds. Preferred stocks may receive dividends but payment is not guaranteed as with a bond. These securities may be undervalued because of a lack of analyst coverage resulting in a high dividend yield or yield to maturity. The risks of preferred stocks are a lack of voting rights and the Adviser may incorrectly analyze the security, resulting in a loss to the Fund. Furthermore, preferred stock dividends are not guaranteed and management can elect to forego the preferred dividend, resulting in a loss to the Fund.

Real Estate Investment Trusts ("REITs")

The Fund may invest in equity interests or debt obligations issued by REITs. REITs are pooled investment vehicles which invest primarily in income producing real estate or real estate related loans or interest. REITs are generally classified as equity REITs, mortgage REITs or a combination of equity and mortgage REITs. Equity REITs invest the majority of their assets directly in real property and derive income primarily from the collection of rents. Equity REITs can also realize capital gains by selling property that has appreciated in value. Mortgage REITs invest the majority of their assets in real estate mortgages and derive income from the collection of interest payments. Similar to investment companies, REITs are not taxed on income distributed to shareholders provided they comply with several requirements of the Internal Revenue Code. The Fund will indirectly bear its proportionate share of expenses incurred by

REITs in which the Fund invests in addition to the expenses incurred directly by the Fund.

Investing in REITs involves certain unique risks in addition to those risks associated with investing in the real estate industry in general. Equity REITs may be affected by changes in the value of the underlying property owned by the REITs, while mortgage REITs may be affected by the quality of any credit extended. REITs are dependent upon management skills, are not diversified, are subject to heavy cash flow dependency, default by borrowers and self-liquidation. REITs are also subject to the possibilities of failing to qualify for tax free pass-through of income under the Internal Revenue Code and failing to maintain their exemption from registration under the 1940 Act.

REITs (especially mortgage REITs) are also subject to interest rate risks. When interest rates decline, the value of a REIT's investment in fixed-rate obligations can be expected to rise. Conversely, when interest rates rise, the value of a REIT's investment in fixed-rate obligations can be expected to decline. In contrast, as interest rates on adjustable rate mortgage loans are reset periodically, yields on a REIT's investment in such loans will gradually align themselves to fluctuate less dramatically in response to interest rate fluctuations than would investments in fixed-rate obligations.

Investment in REITs involves risks similar to those associated with investing in small capitalization companies. These risks include:

- limited financial resources;
- infrequent or limited trading;
- more abrupt or erratic price movements than larger company securities; and
- in addition, small capitalization stocks, such as REITs, historically have been more volatile in price than the larger capitalization stocks included in the S&P 500 Index.

Repurchase Agreements

The Fund may invest in fully collateralized repurchase agreements. A repurchase agreement is a short-term investment in which the purchaser (i.e., the Fund) acquires ownership of a security and the seller agrees to repurchase the obligation at a future time at a set price, thereby determining the yield during the purchaser's holding period (usually not more than 7 days from the date of purchase). Any repurchase transaction in which the Fund engages will require full collateralization of the seller's obligation during the entire term of the repurchase agreement. In the event of a bankruptcy or other default of the seller, the Fund could experience both delays in liquidating the underlying security and losses in value. However, the Fund intends to enter into repurchase agreements only with its custodian, other banks with assets of \$1 billion or more and registered securities dealers determined by the Adviser to be creditworthy. The Adviser monitors the creditworthiness of the banks and securities dealers with which the Fund engages in

repurchase transactions. The Fund may not enter into a repurchase agreement with a term of more than seven days if, as a result, more than 15% of the value of its net assets would then be invested in such repurchase agreements and other illiquid investments.

Reverse Repurchase Transactions

The Fund may enter into reverse repurchase transactions. In a reverse repurchase transaction, the Fund concurrently agrees to sell portfolio securities to financial institutions such as banks and broker-dealers, and to repurchase the same securities at a later date at a mutually agreed upon price. The repurchase price generally is equal to the original sales price plus interest. The Fund retains record ownership of the securities and the right to receive interest and principal payments. The Fund may enter into a reverse repurchase transaction in order to obtain funds to pursue additional investment opportunities with a return in excess of the cost of the reverse repurchase transaction. Such transactions may increase fluctuations in the market value of Fund assets and may be viewed as a form of leverage. Reverse purchase transactions also involve the risk that the market value of the securities sold by the Fund may decline below the price at which the Fund is obligated to repurchase the securities. In the event of bankruptcy or other default by the purchaser, the Fund could experience both delays in repurchasing the portfolio securities and losses. The Fund will enter into reverse purchase transactions only with parties whose creditworthiness has been reviewed and found satisfactory by the Adviser.

Reverse purchase transactions are considered by the U.S. Securities and Exchange Commission ("SEC") to be borrowings by the Fund under the 1940 Act. At the time a Fund enters into a reverse purchase transaction, it will direct its custodian to place in a segregated account assets (such as cash or liquid securities consistent with the Fund's investment restrictions) having a value equal to the repurchase price (including accrued interest). The Fund will monitor the account to ensure that the market value of the account equals the amount of a Fund's commitment to repurchase securities.

Rights

Rights are usually granted to existing shareholders of a corporation to subscribe to shares of a new issue of common stock before it is issued to the public. The right entitles its holder to buy common stock at a specified price. Rights have similar features to warrants, except that the life of a right is typically much shorter, usually a few weeks. The Adviser believes rights may become underpriced if they are sold without regard to value and if analysts do not include them in their research. The risk in investing in rights is that the Adviser might miscalculate their value resulting in a loss to the Fund. Another risk is the underlying common stock may not reach the Adviser's anticipated price within the life of the right.

Short Sales

The Fund may seek to realize additional gains or hedge investments by selling a security short. A short sale is a transaction in which the Fund sells a security that it does not own in anticipation of a decline in the market price of the security. To complete the short sale, the Fund must arrange through a broker to borrow the security in order to deliver it to the buyer. The Fund is obligated to replace the borrowed security by purchasing it at a market price at or prior to the time it must be returned to the lender. The price at which the Fund is required to replace the borrowed security may be more or less than the price at which the security was sold by the Fund. Until the security is replaced, the Fund is required to repay the lender any dividends or interest attributable to the borrowed security that may accrue during the period of the loan. To borrow the security, the Fund may be required to pay a premium, which would increase the cost of the security sold. Until the short position is closed out, the Fund also will incur transaction costs.

The net proceeds of the short sale plus any additional cash collateral will be retained by the broker to the extent necessary to meet margin requirements and provide a collateral cushion in the event that the value of the security sold short increases. The Fund will receive the net proceeds after it closes out the short position by replacing the borrowed security. Until the Fund closes the short position, the Fund also must maintain a segregated account with its custodian consisting of cash or other liquid securities in an amount at least equal to (i) the current market value of the security sold short, (ii) less any collateral deposited with the broker (not including the proceeds of the short sale). The assets in the segregated account are marked to market daily. The collateral held by the broker and the segregated account with the custodian will not necessarily limit the Fund's potential loss on a short sale, which is unlimited.

The Fund will incur a loss if the price of the security increases between the date of the short sale and the date on which the Fund replaces the borrowed security. A Fund will realize a gain if the price of the security declines between those dates. The amount of any gain will be decreased, and the amount of any loss increased, by the amount of any premium, dividend, interest or expenses the Fund may be required to pay in connection with the short sale. There can be no assurance that the Fund will be able to close out a short position at any particular time or at an acceptable price.

Time Deposits and Variable Rate Notes

The Fund may invest in fixed time deposits, whether or not subject to withdrawal penalties.

The commercial paper obligations which the Fund may buy are unsecured and may include variable rate notes. The nature and terms of a variable rate note (i.e., a "Master Note") permit the Fund to invest fluctuating amounts at varying rates of interest pursuant to a direct arrangement between the Fund as Lender, and the issuer, as borrower. It permits daily changes in the amounts borrowed. The Fund has the right at any time to increase, up to the full amount stated in the note agreement, or to decrease the amount outstanding under the note. The issuer may prepay at any time and without

penalty any part of or the full amount of the note. The note may or may not be backed by one or more bank letters of credit. Because these notes are direct lending arrangements between the Fund and the issuer, it is not generally contemplated that they will be traded; moreover, there is currently no secondary market for them. Except as specifically provided in the Prospectus, there is no limitation on the type of issuer from whom these notes may be purchased; however, in connection with such purchase and on an ongoing basis, the Adviser will consider the earning power, cash flow and other liquidity ratios of the issuer, and its ability to pay principal and interest on demand, including a situation in which all holders of such notes made demand simultaneously. Variable rate notes are subject to the Fund's investment restriction on illiquid securities unless such notes can be put back to the issuer on demand within seven days.

Structured Notes, Bonds and Debentures

The Fund may invest in structured notes, bonds and debentures. Typically, the value of the principal and/or interest on these instruments is determined by reference to changes in the value of specific currencies, interest rates, commodities, indexes or other financial indicators (the "Reference") or the relevant change in two or more References. The interest rate or the principal amount payable upon maturity or redemption may be increased or decreased depending upon changes in the applicable Reference. The terms of the structured securities may provide that in certain circumstances no principal is due at maturity and, therefore, may result in the loss of the Fund's entire investment. The value of structured securities may move in the same or the opposite direction as the value of the Reference, so that appreciation of the Reference may produce an increase or decrease in the interest rate or value of the security at maturity. In addition, the change in interest rate or the value of the security at maturity may be a multiple of the change in the value of the Reference so that the security may be more or less volatile than the Reference, depending on the multiple. Consequently, structured securities may entail a greater degree of market risk and volatility than other types of debt obligations.

Underlying Funds

The Fund may also invest in exchange traded funds ("ETFs"), other mutual funds, or closed end funds (collectively "Underlying Funds"). Investments in Underlying Funds involve duplication of investment advisory fees and certain other expenses. In addition, because certain Underlying Funds are listed on national stock exchanges and are traded like equity securities listed on an exchange, their shares potentially may trade at a discount or a premium. Investments in Underlying Funds may also be subject to brokerage and other trading costs, which could result in greater expenses to the Fund.

U.S. Government Securities

The Fund may invest in U.S. government securities. These securities may be backed by the credit of the government as a whole or only by the issuing agency. U.S. Treasury bonds, notes, and bills and some agency securities, such as those issued by the Federal Housing Administration and the Government National Mortgage Association

(Ginnie Mae), are backed by the full faith and credit of the U.S. government as to payment of principal and interest and are the highest quality government securities. Other securities issued by U.S. government agencies or instrumentalities, such as securities issued by the Federal Home Loan Banks and the Federal Home Loan Mortgage Corporation (Freddie Mac), are supported only by the credit of the agency that issued them, and not by the U.S. government. Securities issued by the Federal Farm Credit System, the Federal Land Banks, and the Federal National Mortgage Association (Fannie Mae) are supported by the agency's right to borrow money from the U.S. Treasury under certain circumstances, but are not backed by the full faith and credit of the U.S. government.

The Fund's investments in U.S. Government securities may include agency step-up obligations. These obligations are structured with a coupon rate that "steps-up" periodically over the life of the obligation. Step-up obligations typically contain a call option, permitting the issuer to buy back the obligation upon exercise of the option. Step-up obligations are designed for investors who are unwilling to invest in a long-term security in a low interest rate environment. Step-up obligations are used in an attempt to reduce the risk of a price decline should interest rates rise significantly at any time during the life of the obligation. However, step-up obligations also carry the risk that market interest rates may be significantly below the new, stepped-up coupon rate. If this occurs, the issuer of the obligation likely will exercise the call option, leaving investors with cash to reinvest. As a result, these obligations may expose the Fund to the risk that proceeds from a called security may be reinvested in another security paying a lower rate of interest.

Warrants

Warrants are securities that are usually issued with a bond or preferred stock but may trade separately in the market. A warrant allows its holder to purchase a specified amount of common stock at a specified price for a specified time. The risk in investing in warrants is that the Adviser might miscalculate their value, resulting in a loss to the Fund. Another risk is the warrants will not realize their value because the underlying common stock does not reach the Adviser's anticipated price within the life of the warrant.

When-Issued, Forward Commitments and Delayed Settlements

The Fund may purchase and sell securities on a when-issued, forward commitment or delayed settlement basis. In this event, the Fund's custodian will segregate liquid assets equal to the amount of the commitment in a separate account. Normally, the custodian will set aside portfolio securities to satisfy a purchase commitment. In such a case, the Fund subsequently may be required to segregate additional assets in order to assure that the value of the account remains equal to the amount of the Fund's commitment. It may be expected that the Fund's net assets will fluctuate to a greater degree when it sets aside portfolio securities to cover such purchase commitments than when it sets aside cash.

The Fund does not intend to engage in these transactions for speculative purposes but only in furtherance of the Fund's investment objective. Because the Fund will segregate liquid assets to satisfy its purchase commitments in the manner described, the Fund's liquidity and the ability of the Adviser to manage them may be affected in the event a Fund's forward commitments, commitments to purchase when-issued securities and delayed settlements ever exceeded 15% of the value of its net assets.

The Fund will purchase securities on a when-issued, forward commitment or delayed settlement basis only with the intention of completing the transaction. If deemed advisable as a matter of investment strategy, however, the Fund may dispose of or renegotiate a commitment after it is entered into, and may sell securities it has committed to purchase before those securities are delivered to the Fund on the settlement date. In these cases the Fund may realize a taxable capital gain or loss. When the Fund engages in when-issued, forward commitment and delayed settlement transactions, it relies on the other party to consummate the trade. Failure of such party to do so may result in the Fund incurring a loss or missing an opportunity to obtain a price credited to be advantageous.

The market value of the securities underlying a when-issued purchase, forward commitment to purchase securities, or a delayed settlement and any subsequent fluctuations in their market value is taken into account when determining the market value of the Fund starting on the day the Fund agrees to purchase the securities. The Fund does not earn interest on the securities it has committed to purchase until it has paid for and delivered on the settlement date.

Portfolio Turnover

The Fund may sell a portfolio investment soon after its acquisition if the Adviser believes that such a disposition is consistent with attaining the investment objective of the Fund. Portfolio investments may be sold for a variety of reasons, such as a more favorable investment opportunity or other circumstances bearing on the desirability of continuing to hold such investments. A high rate of portfolio turnover (over 100%) may involve correspondingly greater transaction costs, which must be borne directly by the Fund and ultimately by its shareholders. High portfolio turnover may result in the realization of substantial net capital gains. To the extent short-term capital gains are realized, distributions attributable to such gains will be ordinary income for federal income tax purposes.

Investment Restrictions

Fundamental Investment Limitations. The investment limitations described below have been adopted by the Trust with respect to the Fund and are fundamental ("Fundamental") (i.e., they may not be changed without the affirmative vote of a majority of the outstanding shares of the Fund). As used in the Prospectus and the Statement of Additional Information, the term "majority" of the outstanding shares of the Fund means the lesser of: (1) 67% or more of the outstanding shares of the Fund present at a meeting, if the holders of more than 50% of the outstanding shares of the Fund is present or

represented at such meeting; or (2) more than 50% of the outstanding shares of the Fund. Other investment practices, which may be changed by the Board of Trustees without the approval of shareholders to the extent permitted by applicable law, regulation or regulatory policy, are considered non-fundamental ("Non-Fundamental").

1. Borrowing Money. The Fund will not borrow money, except: (a) from a bank, provided that immediately after such borrowing there is an asset coverage of 300% for all borrowings of the Fund; or (b) from a bank or other persons for temporary purposes only, provided that such temporary borrowings are in an amount not exceeding 5% of the Fund's total assets at the time when the borrowing is made. This limitation does not preclude the Fund from entering into reverse repurchase transactions.

2. Senior Securities. The Fund will not issue senior securities. This limitation is not applicable to activities that may be deemed to involve the issuance or sale of a senior security by the Fund, provided that the Fund's engagement in such activities is consistent with or permitted by the 1940 Act, the rules and regulations promulgated thereunder or interpretations of the SEC or its staff.

3. Underwriting. The Fund will not underwrite securities of other issuers, except to the extent the Fund may be deemed an underwriter under the Securities Act by virtue of disposing of portfolio securities or when selling its own shares.

4. Real Estate. The Fund will not purchase or sell real estate, unless acquired as a result of ownership of securities or other instruments. This limitation is not applicable to investments in marketable securities that are secured by or represent interests in real estate. This limitation does not preclude the Fund from investing in mortgage-related securities or investing in companies engaged in the real estate business or that have a significant portion of their assets in real estate (including real estate investment trusts).

5. Commodities. The Fund will not purchase or sell commodities or commodity contracts except as may be permitted by the 1940 Act, or unless acquired as a result of ownership of securities or other investments. This limitation does not preclude the Fund from purchasing, selling and entering into financial futures contracts (including futures contracts on indices of securities, interest rates, and currencies), warrants, swaps, forward contracts, foreign currency spot and forward contracts or other derivative instruments, including derivatives related to physical commodities; or purchasing or selling securities or other instruments backed by commodities; or purchasing or selling securities of companies that are engaged in a commodities business or have a significant portion of their assets in commodities.

6. Loans. The Fund will not make loans to others, except that the Fund may, in accordance with its investment objective and policies, (i) lend portfolio securities, (ii) purchase and hold debt securities or other debt instruments, including loan participations and sub-participations, assignments, and structured securities, (iii) make loans secured by mortgages on real property, (iv) enter into repurchase agreements, (v) enter into transactions where each loan is represented by a note executed by the borrower, and (vi) make time deposits with financial institutions and invest in

instruments issued by financial institutions. For purposes of this limitation, the term "loans" shall not include the purchase of a portion of an issue of publicly distributed bonds, debentures or other securities.

7. Concentration. The Fund will not invest 25% or more of its total assets in a particular industry or group of industries, except as permitted by the SEC. This limitation does not apply to investments in securities issued or guaranteed by the U.S. government, or any of its agencies or instrumentalities, or repurchase agreements with respect thereto.

With respect to the percentages adopted by the Trust as maximum limitations on its investment policies and limitations, an excess above the fixed percentage will not be a violation of the policy or limitation unless the excess results immediately and directly from the acquisition of any security or the action taken. This paragraph does not apply to the borrowing policy set forth in paragraph 1 above. If borrowing restrictions have been reached in accordance with Section 18(f)(1), the Fund shall reduce its borrowing within 3 days (not including Sundays and holidays) to the extent required to meet its asset coverage requirements.

Notwithstanding any of the foregoing limitations, any investment company, whether organized as a trust, association or corporation, or a personal holding company, may be merged or consolidated with or acquired by the Trust, provided that if such merger, consolidation or acquisition results in an investment in the securities of any issuer prohibited by said paragraphs, the Trust shall, within ninety days after the consummation of such merger, consolidation or acquisition, dispose of all of the securities of such issuer so acquired or such portion thereof as shall bring the total investment therein within the limitations imposed by said paragraphs above as of the date of consummation.

Non-Fundamental. The following limitations have been adopted by the Trust with respect to the Fund and are Non-Fundamental (see "Investment Limitations - Fundamental" above).

1. Pledging. The Fund will not mortgage, pledge, hypothecate or in any manner transfer, as security for indebtedness, any assets of the Fund except as may be necessary in connection with borrowings described in limitation (1) above. Margin deposits, security interests, liens and collateral arrangements with respect to transactions involving options, futures contracts, short sales and other permitted investments and techniques are not deemed to be a mortgage, pledge or hypothecation of assets for purposes of this limitation.

2. Borrowing. The Fund will not purchase any security while borrowings (including reverse repurchase agreements) representing more than one-third of its total assets are outstanding.

3. Margin Purchases. The Fund will not purchase securities or evidences of interest thereon on "margin." This limitation is not applicable to short-term credit obtained by the Fund for the clearance of purchases and sales or redemption of securities, or to arrangements with respect to transactions involving options, or futures contracts.

4. Illiquid Investments. The Fund will not invest 15% or more of its net assets in securities for which there are legal or contractual restrictions on resale and other illiquid securities.

MANAGEMENT OF THE FUND

The Board of Trustees supervises the business activities of the Trust and appoints the officers. Each Trustee serves as a trustee until the termination of the Trust unless the Trustee dies, resigns, retires or is removed. As of the date of this SAI, the Fund, Fallen Angels Income Fund, Footprints Discover Value Fund, and AINN Fund are the only series in the "Fund Complex." The Board will generally meet four times a year to review the progress and status of the Fund Complex.

Board Leadership Structure

The Trust is led by Gregory B. Getts, who has served as the Chairman of the Board since December 2016. Mr. Getts is an "interested person" as defined in the Investment Company Act of 1940, as amended, by virtue of his controlling interest in Arbor Court Capital, LLC (the Fund's distributor) and his status as an officer of the Trust. The Board of Trustees is comprised of Mr. Getts and two other Trustees, neither of whom are an interested person ("Independent Trustees"). The Independent Trustees have not selected a Lead Independent Trustee. Additionally, under certain 1940 Act governance guidelines that apply to the Trust, the Independent Trustees will meet in executive session, at least quarterly. Under the Trust's practice, the Chairman of the Board is responsible for (a) presiding at board meetings, (b) calling special meetings on an as-needed basis, and, more generally, in-practice (c) execution and administration of Trust policies including (i) setting the agendas for board meetings and (ii) providing information to board members in advance of each board meeting and between board meetings. Generally, the Trust believes it best to have a single leader who is seen by shareholders, business partners and other stakeholders as providing strong leadership. The Trust believes that its Chairman together with the Audit Committee and the full Board of Trustees, provide effective leadership that is in the best interests of the Trust and the Fund shareholders because of the Board's collective business acumen and understanding of the regulatory framework under which investment companies must operate.

Board Risk Oversight

The Board of Trustees is comprised of Mr. Getts and two Independent Trustees with a standing independent Audit Committee with a separate chair. The Board is responsible for overseeing risk management, and the full Board regularly engages in discussions of risk management and receives compliance reports that inform its oversight of risk management from its Chief Compliance Officer at quarterly meetings and on an ad hoc basis, when and if necessary. The Audit Committee considers financial and reporting risk within its area of responsibilities. Generally, the Board believes that its oversight of material risks is adequately maintained through the compliance-reporting chain where the Chief Compliance Officer is the primary recipient

and communicator of such risk-related information, and the Audit Committee's communications with the independent registered public accounting firm.

Trustee Qualifications.

Generally, the Trust believes that each Trustee is competent to serve because of their individual overall merits including: (i) experience, (ii) qualifications, (iii) attributes and (iv) skills.

Dr. Gregory B. Getts – **Interested Trustee** - Dr. Getts is the owner/President of Mutual Shareholder Services, LLC, a status held since 1999. MSS provides transfer agency and accounting services to mutual funds. Since 2012, Dr. Getts has been the owner of Arbor Court Capital, LLC, which is a mutual fund distributor. Dr. Getts earned his Master and Ph.D. in operations research from Case Western Reserve University. Dr. Getts worked in the mutual fund industry since approximately 1980, and has extensive knowledge and expertise in the industry. He pioneered his way in the industry by writing computer software for transfer agent and accounting services that MSS currently uses in its operations. Dr. Getts has been published three times in regards to portfolio risk management and planning. He also developed a PC game for stock and option simulation that was published by Addison-Wesley. Dr. Getts holds Series 7, 23, 24, 27, and 63 designations.

Paul K. Rode Esq. – **Independent Trustee** – Mr. Rode is a 2003 graduate of Wittenberg University with a B.A. in political science, and a 2006 graduate of Cleveland-Marshall College of Law with a J.D. Mr. Rode was admitted to the State Bar of Ohio in 2006, as well as the Northern District Federal Court of Ohio. He belongs to the Ohio State Bar Association, and has been employed at Keith D. Weiner & Assoc. Co. L.P.A. since September 2005. He primarily practices as a litigator and primary brief-writer in the collections department. Mr. Rode is very knowledgeable and experienced in contract law. His contract knowledge is valuable as the Trust enters into and renews various service provider contracts annually. He would also provide great value in the event the Trust finds itself having to enforce or interpret a contract.

Michael Young – **Independent Trustee** – Mr. Young is a former Senior Federal Security Director that retired from federal service after 41.5 years and is currently a Practitioner/Consultant for the Department of Homeland Security. Mr. Young spent 26 years with the United States Secret Service, and worked in investigative and protective divisions, both domestic and foreign. Mr. Young is a graduate of Temple University with a degree in Industrial Management, where he was a Distinguished Military Graduate and received a Regular Army Commission as a 2nd Lieutenant upon entering Active Duty. He served with the 1st Air Cavalry Division for four years in various assignments to include small unit and reconnaissance operations, Division Counterintelligence Operations Officer and Tactical Intelligence Officer. He is a graduate of the U.S. Army Infantry, Ranger and Airborne Schools along with the Army's Tactical and Counterintelligence Schools at Fort Huachuca. Mr. Young is very experienced with setting up efficient and technical operations. His risk management skills will assist the

Trust in the continual development of internal controls and processes, as well as asset oversight.

The Trust does not believe any one factor is determinative in assessing a Trustee's qualifications, but that the collective experience of each Trustee makes the Board highly effective.

The following table provides information regarding each Trustee who is not an "interested person" of the Trust, as defined in the Investment Company Act of 1940, as amended.

Name Address and Year of Birth	Position(s) Held with the Fund	Term of Office/Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex¹ Overseen by Trustee	Other Directorships Held by Trustee
Paul K. Rode, Esq. 8000 Town Centre Drive, Suite 400, Broadview Heights, OH 44147 Year: 1980	Trustee	Indefinite/ October 2016-present	Attorney, Keith D. Weiner & Assoc. Co. L.P.A. since September 2005	4	None
Michael Young 8000 Town Centre Drive, Suite 400, Broadview Heights, OH 44147 Year: 1950	Trustee	Indefinite/ October 2016 - present	November 2013-Present: Consultant/Practitioner for Purdue, Rutgers and Northeastern Universities; June 2002-November 2013: Senior Federal Security Director for U.S. Department of Homeland Security	4	None

¹The "Fund Complex" consists of MSS Series Trust.

The following table provides information regarding each Trustee who is an "interested person" of the Trust, as defined in the Investment Company Act of 1940, as amended, and each officer of the Trust.

Name, Address and Year of Birth	Position(s) Held with the Fund	Term of Office/Length of Time Served	Principal Occupation(s) During Past 5 Years	Number of Portfolios in Fund Complex² Overseen by Trustee	Other Directorships Held by Trustee
Dr. Gregory B. Getts ¹ 8000 Town Centre Drive, Suite 400, Broadview Heights, OH 44147 Year: 1957	Trustee and President	Indefinite/ October 2016 - present	Owner/President, Mutual Shareholder Services, LLC, since 1999; Owner/President Arbor Court Capital, LLC, since January 2012.	4	None

Brandon M. Pokersnik 8000 Town Centre Drive, Suite 400, Broadview Heights, OH 44147 Year: 1978	Treasurer, Secretary and Chief Compliance Officer	Indefinite/ October 2016 - present	Accountant, Mutual Shareholder Services, LLC, since 2008; Attorney Mutual Shareholder Services, LLC, since June 2016; Owner/President, Empirical Administration, LLC, since September 2012. ---	---	--	---	----	----

¹ Gregory B. Getts is considered an "Interested" Trustee as defined in the Investment Company Act of 1940, as amended, because he is an officer of the Trust and President/owner of the Fund's distributor.

²The "Fund Complex" consists of MSS Series Trust.

The Trust's audit committee consists of Paul Rode and Michael Young. The audit committee is responsible for (i) overseeing the accounting and financial reporting policies and practices of the Fund, their internal controls and, as appropriate, the internal controls of certain service providers; (ii) overseeing the quality and objectivity of the Fund's financial statements and the independent audit of the financial statements; and (iii) acting as a liaison between the Fund's independent auditors and the full Board of Trustees. None of the audit committee members are "Interested" as defined in the Investment Company Act of 1940, as amended. During the fiscal year ended November 30, 2018, the Audit Committee held two meetings.

The table below details the amount of compensation payable by the Trust to the previously-serving and currently-serving Trustees for the fiscal year ended November 30, 2018. The Trust does not have a bonus, profit sharing, pension or retirement plan.

Name and Position	Aggregate Compensation From Trust ¹	Pension or Retirement Benefits Accrued as Part of Fund Expenses	Estimated Annual Benefits Upon Retirement	Total Compensation From Trust and Fund Complex ² Paid to Directors
Gregory B. Getts	none	none	none	none
Paul Rode	\$600	none	none	\$3,600
Michael Young	\$600	none	none	\$3,600

¹ As of October 2017, each non-interested Trustee receives \$300 per quarterly meeting attended, per fund.

² The Trust is comprised of the Fallen Angels Income Fund, CCA Aggressive Return Fund, and Footprints Discover Value Fund.

As of December 31, 2018, the Trustees beneficially owned the following amounts in the Fund:

Name of Trustee or Officer	Dollar Range of Securities in the CCA Aggressive Return Fund	Aggregate Dollar Range of Securities In Trust
Gregory B. Getts	None	None
Paul Rode	None	None
Michael Young	None	None

Trustee and Management Ownership

As of December 31, 2018, the Trustees and Officers of the Trust, as a group, owned 0% of the shares of the CCA Aggressive Return Fund.

CODE OF ETHICS

Pursuant to the requirements of Rule 17j-1 under the 1940 Act and in order to protect against certain unlawful acts, practices and courses of business by certain individuals or entities related to the Fund, the Trust, Distributor, the Adviser have each adopted a Code of Ethics and procedures for implementing the provisions of their respective Code. The personnel of the Trust, the Adviser is subject to the Code of Ethics when investing in securities that may be purchased, sold or held by the Fund.

CONTROL PERSONS AND PRINCIPAL HOLDERS OF SECURITIES

Control Persons

A control person is one who owns beneficially or through controlled companies more than 25% of the voting securities of a company or acknowledged the existence of control. A principal shareholder is any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund. The following table provides the name and address of any person who owns of record or beneficially 5% or more of the outstanding shares of the Fund as of March 15, 2019.

Name and Address	Status	Number of Shares	Percent of Shares
Charles Schwab 211 Main St. San Francisco, CA 94105	Beneficial	2,524,398	90.90%
National Financial Services, LLC 200 Seaport Blvd. Boston, MA 02110	Beneficial	242,289	8.74%

INVESTMENT ADVISORY AND OTHER SERVICES

Investment Adviser

The Trustees selected Checchi Capital Advisers, LLC as the investment adviser to the Fund. Adam D. Checchi beneficially owns more than 25% of the Adviser and is deemed to control the Adviser.

Subject to the supervision and direction of the Trustees, the Adviser oversees the Fund's securities and investments to be sure they are made in accordance with the Fund's stated investment objectives and policies. The fee paid to the Adviser is governed by an investment management agreement ("Management Agreement") between the Trust, on behalf of the Fund, and the Adviser. Pursuant to the Management Agreement, the Fund pays the Adviser, on a monthly basis, an annual advisory fee equivalent to 0.75% of the Fund's average daily net assets. Prior to the reorganization of the Fund on October 16, 2017, an affiliate of the Adviser, Checchi Capital Fund Advisers, LLC (the "Prior Adviser"), served as investment adviser to the Fund and the Adviser served as sub-adviser. During the fiscal year ended November 30, 2016, the Fund accrued \$158,090 in advisory fees payable to the Prior Adviser, of which the Prior Adviser waived \$153,101. During the fiscal year ended November 30, 2017, the Fund accrued \$208,507 in advisory fees payable to the Adviser, of which the Adviser waived \$134,275. During the fiscal year ended November 30, 2018, the Fund accrued \$264,962 in advisory fees payable to the Adviser, of which the Adviser waived \$160,644. Pursuant to a sub-advisory agreement between the Prior Adviser and the Adviser, the Adviser as sub-adviser received an annual sub-advisory fee on the Predecessor Fund's average daily net assets equal to 0.25%. The Adviser, then as sub-adviser, was paid by the Prior Adviser, not the Fund. During the fiscal year ended November 30, 2016, the Adviser, as sub-adviser, received \$54,278 with respect to the Fund; and during the fiscal year ended November 30, 2016, the Adviser, as sub-adviser, received \$77,724 with respect to the Fund. During the fiscal year ended November 30, 2017, the Adviser received \$74,232 with respect to the Fund.

Under the Management Agreement, the Adviser, under the supervision of the Board, agrees to invest the assets of the Fund in accordance with applicable law and the investment objective, policies and restrictions set forth in the Fund's then current Prospectus and Statement of Additional Information, and subject to such further limitations as the Trust may from time to time impose by written notice to the Adviser. The Adviser shall act as the investment adviser to the Fund and, as such shall (i) obtain and evaluate such information relating to the economy, industries, business, securities markets and securities as it may deem necessary or useful in discharging its responsibilities here under, (ii) formulate a continuing program for the investment of the assets of the Fund in a manner consistent with its investment objective, policies and restrictions, and (iii) determine from time to time securities to be purchased, sold, retained or lent by the Fund, and implement those decisions, including the selection of entities with or through which such purchases, sales or loans are to be effected; provided, that the Adviser will place orders pursuant to its investment determinations either directly with the issuer or with a broker or dealer, and if with a broker or dealer,

(a) will attempt to obtain the best price and execution of its orders, and (b) may nevertheless in its discretion purchase and sell portfolio securities from and to brokers who provide the Adviser with research, analysis, advice and similar services and pay such brokers in return a higher commission or spread than may be charged by other brokers. The Adviser also provides the Fund with all necessary office facilities and personnel for servicing the Fund's investments, compensates all officers, Trustees and employees of the Trust who are officers, directors or employees of the Adviser, and all personnel of the Fund or the Adviser performing services relating to research, statistical and investment activities. The Management Agreement was approved by the Board of the Trust, including by a majority of the Independent Trustees, at a meeting held on June 5, 2017.

Expenses not expressly assumed by CCA under the Management Agreement or an expense limitation agreement described below are paid by the Fund. Under the terms of the Management Agreement, the Fund is responsible for the payment of the following expenses among others: (a) the fees payable to the Adviser, (b) the fees and expenses of Trustees who are not affiliated persons of the Adviser (c) the fees and certain expenses of the Custodian and Transfer and Dividend Disbursing Agent (as defined under the section entitled "Transfer Agent"), including the cost of maintaining certain required records of the Fund and of pricing the Fund's shares, (d) fees and expenses of the shareholder service agent, plan agent, administrator, accounting and pricing services agent and underwriter of the Fund, (e) the charges and expenses of legal counsel and independent accountants for the Fund, (f) brokerage commissions and any issue or transfer taxes chargeable to the Fund in connection with its securities transactions, (g) all taxes and corporate fees payable by the Fund to governmental agencies, (h) expenses incurred directly or indirectly in connection with the sale or distribution of the Fund's shares that the Fund is authorized to pay pursuant to Rule 12b-1, (i) the cost of fidelity and liability insurance, (j) the fees and expenses involved in registering and maintaining registration of the Fund and of its shares with the SEC, qualifying its shares under state securities laws, including the preparation and printing of the Fund's registration statements and prospectuses for such purposes, (k) all expenses of shareholders and Trustees' meetings (including travel expenses of Trustees and officers of the Fund who are directors, officers or employees of the Adviser) and of preparing, printing and mailing reports, proxy statements and prospectuses to shareholders in the amount necessary for distribution to the shareholders, (l) the Fund's share of the Trust's organizational expenses and (m) litigation and indemnification expenses and other extraordinary expenses not incurred in the ordinary course of the Fund's business.

The Adviser has contractually agreed to reduce its fees and to reimburse expenses, until at least April 1, 2020, to ensure that total annual Fund operating expenses after fee waiver and reimbursement (exclusive of any 12b-1 fees, acquired fund fees and expenses, taxes, short selling expenses, interest, brokerage commissions, expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation) will not exceed 0.90% of the average daily net assets attributable to the Institutional Class of the Fund. These fee waivers and expense reimbursements are subject to possible recoupment from the Fund within three

years after the date of the waiver or reimbursement, if such recoupment is approved by the Board. The Fund may only make a repayment to the CCA if such repayment does not cause the Fund's expenses, after the repayment is taken into account, to exceed both 1) the expense cap in place at the time the expenses were waived, and 2) the Fund's current expense cap. This agreement may be terminated only by the Fund's Board of Trustees, on 60 days written notice to the Adviser. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance.

The Management Agreement continues in effect for two years initially and thereafter shall continue from year to year provided such continuance is approved at least annually by (a) a vote of the majority of the Independent Trustees, cast in person at a meeting specifically called for the purpose of voting on such approval and by (b) the majority vote of either all of the Trustees or the vote of a majority of the outstanding shares of the Fund. The Management Agreement may be terminated without penalty on 60 days written notice by a vote of a majority of the Trustees or by the Adviser, or by holders of a majority of that Trust's outstanding shares. The Management Agreement shall terminate automatically in the event of its assignment.

Portfolio Managers

Adam Checchi and Samuel Pfister are the portfolio managers jointly and primarily responsible for the day-to-day management of the Fund. As of November 30, 2018, Mr. Checchi was responsible for the management of the following other types of accounts for CCA (other than the Fund):

Account Type	Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Registered Investment Companies	0	\$0	0	0
Other Pooled Investment Vehicles	2	\$10,300,000	0	0
Other Accounts	681	\$786,000,000	0	0

As of November 30, 2018, Mr. Pfister was responsible for the management of the following other types of accounts for CCA (other than the Fund):

Account Type	Number of Accounts by Account Type	Total Assets By Account Type	Number of Accounts by Type Subject to a Performance Fee	Total Assets By Account Type Subject to a Performance Fee
Registered Investment Companies	0	\$0	0	0
Other Pooled Investment Vehicles	2	\$10,300,000	0	0
Other Accounts	621	\$786,000,000	0	0

Conflicts of Interest

As indicated in the table above, the portfolio managers may manage numerous accounts for multiple clients. These accounts include the Fund and separate accounts (i.e., accounts managed on behalf of individuals or public or private institutions). The portfolio managers make investment decisions for each account based on the investment objectives and policies and other relevant investment considerations applicable to that portfolio.

When a portfolio manager has responsibility for managing more than one account, potential conflicts of interest may arise. Those conflicts could include preferential treatment of one account over others in terms of allocation of resources or of investment opportunities. For instance, the Adviser may receive fees from certain accounts that are higher than the fee it receives from the Fund. In those instances, the portfolio managers may have an incentive to favor the higher fee account over the Fund. The Adviser has adopted policies and procedures designed to address these potential material conflicts. For instance, the Adviser utilizes a system for allocating investment opportunities among portfolios that is designed to provide a fair and equitable allocation.

Each portfolio manager's compensation is based on salary and a discretionary bonus that is not tied to the performance of the Fund. In the case of Mr. Checchi, he also receives a share of the profits of the Adviser, as a beneficial owner of the firm.

Distributor

Arbor Court Capital, LLC, located at 8000 Town Centre Drive, Broadview Heights, OH 44147 (the "Distributor") serves as the principal underwriter and national distributor for the shares of the Trust pursuant to an underwriting agreement with the Trust (the "Underwriting Agreement"). The Distributor is registered as a broker-dealer under the Securities Exchange Act of 1934, each state's securities laws and is a member of FINRA. The offering of the Fund's shares are continuous. The Underwriting Agreement provides that the Distributor, as agent in connection with the distribution of Fund shares, will use its best efforts to distribute the Fund's shares.

The Underwriting Agreement provides that, unless sooner terminated, it shall continue from year to year, subject to annual approval by (a) the Board or a vote of a majority of the outstanding shares, and (b) by a majority of the Trustees who are not interested persons of the Trust or of the Distributor by vote cast in person at a meeting called for the purpose of voting on such approval.

The Underwriting Agreement may be terminated by the Fund at any time, without the payment of any penalty, by vote of a majority of the entire Board of the Trust or by vote of a majority of the outstanding shares of the Fund on 60 days written notice to the Distributor, or by the Distributor at any time, without the payment of any penalty, on 60 days written notice to the Fund. The Underwriting Agreement will automatically terminate in the event of its assignment.

The following table sets forth the total compensation received by the Distributor from the Fund during the fiscal year ended November 30, 2018:

Fund	Net Underwriting Discounts and Commissions	Compensation on Redemptions and Repurchases	Brokerage Commissions	Other Compensation
CCA Aggressive Return Fund	\$0	\$0	\$0	\$14,925

Custodian

US Bank, N.A., 1555 N. River Center Drive, MK-WI-S302, Milwaukee, Wisconsin 53212, serves as the Fund's custodian ("Custodian"). The Custodian acts as the Fund's depository, provides safekeeping of its portfolio securities, collects all income and other payments with respect thereto, disburses funds at the Fund's request and maintains records in connection with its duties.

Fund Services

Mutual Shareholder Services, LLC ("MSS"), 8000 Town Centre Drive, Suite 400, Broadview Heights, Ohio 44147-4003, acts as the transfer agent ("Transfer Agent")

for the Fund. MSS maintains the records of the shareholder's account, answers shareholders' inquiries concerning their accounts, processes purchases and redemptions of the Fund's shares, acts as dividend and distribution disbursing agent and performs other transfer agent and shareholder service functions.

In addition, MSS provides the Fund with fund accounting services, which includes certain monthly reports, record-keeping and other management-related services. For its services as fund accountant ("Fund Accounting Agent"), MSS receives an annual fee from the Trust based on the average value of the Fund. These fees are: from \$0 to \$25 million in assets the annual fee is \$22,200, from \$25 million to \$50 million in assets the annual fee is \$31,700, from \$50 million to \$75 million in assets the annual fee is \$37,450, from \$75 million to \$100 million in assets the annual fee is \$43,200, from \$100 million to \$125 million in assets the annual fee is \$48,950, from \$125 million to \$150 million in assets the annual fee is \$54,700, from \$150 million to \$200 million in assets the annual fee is \$60,450, from \$200 million to \$300 million in assets the annual fee is \$60,450 plus .01% on assets greater than \$200 million and for assets above \$300 million the annual fee is \$70,450 plus .005% on assets greater than \$300 million. The Trust will receive a discount ranging from 10% to 50% depending on the net assets of the Fund until the Trust reaches \$10 million in assets. Empirical Administration, LLC, an affiliate of MSS, also provides asset and income diversification testing, preparation of board materials and meeting minutes for an additional \$600 per month. During the fiscal year ended November 30, 2016, the Fund as Predecessor Fund paid MSS \$41,200. During the fiscal year ended November 30, 2017, the Fund as Predecessor Fund paid MSS \$6,246. During the fiscal year ended November 30, 2017, the Fund paid MSS \$35,182. During the fiscal year ended November 30, 2018, the Fund paid MSS \$52,551.

Compliance Services

Empirical Administration, LLC ("Empirical"), 8000 Town Centre Drive, Suite 400, Broadview Heights, Ohio, 44147, provides compliance services to the Fund. Empirical is paid \$500 a month for its compliance services. Brandon Pokersnik of Empirical is also the CCO of the Trust.

During the fiscal year ended November 30, 2018, the Fund paid \$6,016 to Empirical for compliance services.

Independent Registered Public Accounting Firm

The firm of Sanville & Company, 1514 Old York Road, Abington, Pennsylvania 19001, has been selected as independent registered public accounting firm for the Fund's for the fiscal year ending November 30, 2019. Sanville & Company will perform an annual audit of the Fund's financial statements and provides financial, tax and accounting services as requested.

Legal Counsel

Thompson Hine LLP, 41 South High Street, 17th Floor, Columbus, OH 43215,

serves as the Trust's legal counsel.

BROKERAGE ALLOCATION AND OTHER PRACTICES

Subject to policies established by the Board of Trustees, the Adviser is responsible for the Fund's portfolio decisions and the placing of the Fund's portfolio transactions. In placing portfolio transactions, the Adviser seeks the best qualitative execution for the Fund, taking into account such factors as price (including the applicable brokerage commission or dealer spread), the execution capability, financial responsibility and responsiveness of the broker or dealer and the brokerage and research services provided by the broker or dealer. The Adviser seeks favorable prices and commission rates that are reasonable in relation to the benefits received.

The Adviser is specifically authorized to select brokers or dealers who also provide brokerage and research services to the Fund and/or the other accounts over which the Adviser exercises investment discretion, and to pay such brokers or dealers a commission in excess of the commission another broker or dealer would charge if the Adviser determines in good faith that the commission is reasonable in relation to the value of the brokerage and research services provided. The determination may be viewed in terms of a particular transaction or the Adviser's overall responsibilities with respect to the Trust and to other accounts over which it exercises investment discretion. The Adviser may not give consideration to sales of shares of the Trust as a factor in the selection of brokers and dealers to execute portfolio transactions. However, the Adviser may place portfolio transactions with brokers or dealers that promote or sell the Fund's shares so long as such placements are made pursuant to policies approved by the Board of Trustees that are designed to ensure that the selection is based on the quality of the broker's execution and not on its sales efforts.

Research services include supplemental research, securities and economic analyses, statistical services and information with respect to the availability of securities or purchasers or sellers of securities, and analyses of reports concerning performance of accounts. The research services and other information furnished by brokers through whom the Fund effects securities transactions may also be used by the Adviser in servicing all of its accounts. Similarly, research and information provided by brokers or dealers serving other clients may be useful to the Adviser in connection with its services to the Fund. Although research services and other information are useful to the Fund and the Adviser, it is not possible to place a dollar value on the research and other information received. It is the opinion of the Board of Trustees and the Adviser that the review and study of the research and other information will not reduce the overall cost to the Adviser of performing its duties to the Fund under the Agreement.

Over-the-counter transactions will be placed either directly with principal market makers or with broker-dealers, if the same or a better price, including commissions and executions, is available. Fixed income securities are normally purchased directly from the issuer, an underwriter or a market maker. Purchases include a concession paid by the issuer to the underwriter and the purchase price paid to a market maker may include the spread between the bid and asked prices.

When the Fund and another of the Adviser's clients seek to purchase or sell the same security at or about the same time, the Adviser may execute the transaction on a combined ("blocked") basis. Blocked transactions can produce better execution for the Fund because of the increased volume of the transaction. If the entire blocked order is not filled, the Fund may not be able to acquire as large a position in such security as it desires or it may have to pay a higher price for the security. Similarly, the Fund may not be able to obtain as large an execution of an order to sell or as high a price for any particular portfolio security if the other client desires to sell the same portfolio security at the same time. In the event that the entire blocked order is not filled, the purchase or sale will normally be allocated on a pro rata basis. The Adviser may adjust the allocation when, taking into account such factors as the size of the individual orders and transaction costs, the Adviser believes an adjustment is reasonable. For the fiscal year ended November 30, 2016, the Fund paid \$59,197 in brokerage commissions. For the fiscal year ended November 30, 2017, the Fund paid \$62,161 in brokerage commissions. For the fiscal year ended November 30, 2018, the Fund paid \$77,876 in brokerage commissions.

DISCLOSURE OF PORTFOLIO HOLDINGS

The Fund is required to include a schedule of portfolio holdings in the annual and semi-annual reports to shareholders, which is sent to shareholders within 60 days of the end of the second and fourth fiscal quarters and which is filed with the SEC on Form N-CSR within 70 days of the end of the second and fourth fiscal quarters. The Fund also is required to file a schedule of portfolio holdings with the SEC on Form N-Q within 60 days of the end of the first and third fiscal quarters. The Fund must provide a copy of the complete schedule of portfolio holdings as filed with the SEC to any shareholder of the Fund, upon request, free of charge. This policy is applied uniformly to all shareholders of the Fund without regard to the type of requesting shareholder (i.e., regardless of whether the shareholder is an individual or institutional investor). The Fund may also, from time to time, list the Fund's top ten holdings on its website. The Fund may enter into ongoing arrangements to release portfolio holdings to rating agencies, such as Morningstar or Lipper, in order for the agencies to assign a rating or ranking to the Fund. Portfolio holdings will be supplied to rating agencies no more frequently than quarterly and only after the Fund has filed a Form N-CSR or Form N-Q with the SEC. The Fund currently does not have any ongoing arrangements to release portfolio holdings information to rating agencies.

Pursuant to policies and procedures adopted by the Board of Trustees, the Fund has ongoing arrangements to release portfolio holdings information on a daily basis to the Adviser, Distributor, Administrator, Transfer Agent, Fund Accounting Agent and Custodian and on an as needed basis to other third parties providing services to the Fund. The Adviser, Administrator, Transfer Agent, Fund Accounting Agent and Custodian receive portfolio holdings information daily in order to carry its the essential operations of the Fund. The Fund discloses portfolio holdings to their auditors, legal counsel, proxy voting services (if applicable), pricing services, printers, parties to merger and reorganization agreements and their agents, and prospective or newly hired investment advisers. The lag between the date of the information and the date on

which the information is disclosed will vary based on the identity of the party to whom the information is disclosed. For instance, the information may be provided to auditors within days of the end of an annual period, while the information may be given to legal counsel at any time.

The Fund, the Adviser, the Distributor, the Transfer Agent, the Fund Accounting Agent and the Custodian are prohibited from entering into any special or ad hoc arrangements with any person to make available information about the Fund's portfolio holdings without the specific approval of the Board. Any party wishing to release portfolio holdings information on an ad hoc or special basis must submit any proposed arrangement to the Board, which will review the arrangement to determine (i) whether the arrangement is in the best interests of the Fund's shareholders, (ii) the information will be kept confidential (based on the factors discussed below), (iii) whether sufficient protections are in place to guard against personal trading based on the information, and (iv) whether the disclosure presents a conflict of interest between the interests of Fund shareholders and those of the Adviser, or any affiliated person of the Fund or the Adviser. Additionally, the Adviser and any affiliated persons of the Adviser is prohibited from receiving compensation or other consideration, for themselves or on behalf of the Fund, as a result of disclosing the Fund's portfolio holdings. The Fund's Chief Compliance Officer monitors compliance with these procedures and reviews their effectiveness on an annual basis.

Information disclosed to third parties, whether on an ongoing or ad hoc basis, is disclosed under conditions of confidentiality. "Conditions of Confidentiality" include (i) confidentiality clauses in written agreements, (ii) confidentiality implied by the nature of the relationship (e.g., attorney-client relationship), (iii) confidentiality required by fiduciary or regulatory principles (e.g., custody relationships) or (iv) understandings or expectations between the parties that the information will be kept confidential. The agreements with the Fund's Adviser, Distributor, Transfer Agent, Fund Accounting Agent and Custodian contain confidentiality clauses, which the Board and these parties have determined extend to the disclosure of nonpublic information about the Fund's portfolio holdings and the duty not to trade on the non-public information. The Fund believes, based upon its size and history, that these are reasonable procedures to protect the confidentiality of the Fund's portfolio holdings and will provide sufficient protection against personal trading based on the information.

ANTI-MONEY LAUNDERING PROGRAM

The Trust has established an Anti-Money Laundering Compliance Program (the "Program") as required by the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 ("USA PATRIOT Act"). To ensure compliance with this law, the Trust's Program provides for the development of internal practices, procedures and controls, designation of anti-money laundering compliance officers, an ongoing training program and an independent audit function to determine the effectiveness of the Program.

Procedures to implement the Program include, but are not limited to, determining that the Fund's Transfer Agent has established proper anti-money laundering procedures, reported suspicious and/or fraudulent activity and a complete and thorough review of all new opening account applications. The Trust will not transact business with any person or entity whose identity cannot be adequately verified under the provisions of the USA PATRIOT Act.

As a result of the Program, the Trust may be required to "freeze" the account of a shareholder if the shareholder appears to be involved in suspicious activity or if certain account information matches information on government lists of known terrorists or other suspicious persons, or the Trust may be required to transfer the account or proceeds of the account to a governmental agency.

PURCHASE, REDEMPTION AND PRICING OF SHARES

Purchase of Shares

Investors may purchase Fund shares after receipt of a current prospectus and by filling out and submitting an application supplied by the Fund. You also may purchase shares through a brokerage firm or other intermediary that has contracted with the Trust to sell shares of the Fund. Orders for shares received by the Fund in good order prior to 4:00 p.m. (Eastern Time) on each day during such periods that the NYSE is open for trading are priced at NAV per share or offering price (NAV plus a sales charge, if applicable) computed as of the close of the regular session of trading on the NYSE. Orders received in good order after 4:00 p.m. (Eastern Time), or on a day the NYSE is not open for trading, are priced at the close of such NYSE on the next day on which it is open for trading at the next determined NAV or offering price per share.

You may buy shares on any "business day." Business days are Monday through Friday, other than days the NYSE is closed, including the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Independence Day, Labor Day, Thanksgiving and Christmas Day.

Redemption of Shares

The Fund will redeem all or any portion of a shareholder's shares in the Fund when requested in accordance with the procedures set forth in the "Redemptions" section of the Prospectus. Under the 1940 Act, a shareholder's right to redeem shares and to receive payment therefore may be suspended at times:

- (a) when the NYSE is closed, other than customary weekend and holiday closings;
- (b) when trading on that exchange is restricted for any reason;
- (c) when an emergency exists as a result of which disposal by the Fund of securities owned by it is not reasonably practicable or it is not reasonably

practicable for the Fund to fairly determine the value of its net assets, provided that applicable rules and regulations of the Securities and Exchange Commission (or any succeeding governmental authority) will govern as to whether the conditions prescribed in (b) or (c) exist; or

(d) when the Securities and Exchange Commission by order permits a suspension of the right to redemption or a postponement of the date of payment on redemption.

In case of suspension of the right of redemption, payment of a redemption request will be made based on the NAV next determined after the termination of the suspension.

The redemption price is the NAV next determined after notice is received by the Fund for redemption of shares, minus the amount of any applicable redemption fee. The proceeds received by the shareholder may be more or less than his/her cost of such shares, depending upon the NAV at the time of redemption and the difference should be treated by the shareholder as a capital gain or loss for federal and state income tax purposes.

The Fund may purchase shares of ETFs/Underlying Funds which charge a redemption fee to shareholders (such as the Fund) that redeem shares of the Underlying Fund within a certain period of time (such as one year). The fee is payable to the Underlying Fund. Accordingly, if the Fund were to invest in an Underlying Fund and incur a redemption fee as a result of redeeming shares in such Underlying Fund, the Fund would bear such redemption fee. The Fund will not, however, invest in shares of an Underlying Fund that is sold with a contingent deferred sales load.

Supporting documents in addition to those listed under "Redemptions" in the Prospectus will be required from executors, administrators, Trustees, or if redemption is requested by someone other than the shareholder of record. Such documents include, but are not restricted to, stock powers, Trust instruments, certificates of death, appointments as executor, certificates of corporate authority and waiver of tax required in some states when settling estates.

Redemption Fee/Market Timing

The Fund discourages and does not accommodate market timing. Market timing is an investment strategy using frequent purchases and redemptions and/or exchanges in an attempt to profit from short term market movements. Market timing may result in dilution of the value of Fund's shares held by long term shareholders, disrupt portfolio management, and increase Fund expenses for all shareholders. The Board of Trustees has adopted a policy requiring the Fund's transfer agent to monitor shareholder activity for purchases and redemptions and/or exchanges that reasonably indicate market timing activity. The transfer agent does not employ an objective standard and may not be able to identify all market timing activity or may misidentify certain trading activity as market timing activity. The Board of Trustees also has adopted a redemption policy to

discourage short term traders and/ or market timers from investing in the Fund. A 2.00% fee will be assessed against investment proceeds withdrawn within 60 days of investment. Shares held longest will be treated as being redeemed first and shares held shortest as being redeemed last. The redemption fee is intended to offset the costs associated with short-term shareholder trading and is retained by the Fund. The redemption fee is applied uniformly in all cases.

While the Fund attempts to deter market timing, there is no assurance that it will be able to identify and eliminate all market timers. For example, certain accounts called "omnibus accounts" include multiple shareholders. Omnibus accounts typically provide the Fund with a net purchase or redemption request on any given day where purchasers of Fund shares and redeemers of Fund shares are netted against one another and the identity of individual purchasers and redeemers whose orders are aggregated is not known by the Fund. The netting effect often makes it more difficult to apply redemption fees, and there can be no assurance that the Fund will be able to apply the fee to such accounts in an effective manner. Brokers maintaining omnibus accounts with the Fund have agreed to provide shareholder transaction information, to the extent known to the broker, to the Fund upon request. If the Fund becomes aware of market timing in an omnibus account, it will work with the broker maintaining the omnibus account to identify the shareholder engaging in the market timing activity. In addition to the redemption fee, the Fund reserves the right to reject any purchase order for any reason, including purchase orders that it does not think are in the best interest of the Fund or its shareholders or if the Fund thinks that trading is abusive.

Waivers of Redemption Fees: The Fund has elected not to impose the redemption fee for:

- redemptions and exchanges of Fund shares acquired through the reinvestment of dividends and distributions;
- certain types of redemptions and exchanges of Fund shares owned through participant-directed retirement plans;
- redemptions or exchanges in discretionary asset allocation, fee based or wrap programs ("wrap programs") that are initiated by the sponsor/financial advisor as part of a periodic rebalancing;
- redemptions or exchanges in a fee based or wrap program that are made as a result of a full withdrawal from the wrap program or as part of a systematic withdrawal plan including the Fund's systematic withdrawal plan;
- involuntary redemptions, such as those resulting from a shareholder's failure to maintain a minimum investment in the Fund, or to pay shareholder fees; or
- other types of redemptions as the Adviser or the Trust may determine in special situations and approved by the Fund's or the Adviser's Chief Compliance Officer.

Pricing of Shares

The NAV of the shares of the Fund is determined at the close of trading (normally 4:00 p.m., Eastern Time) on each day the NYSE is open for business. For a description

of the methods used to determine the net asset value, see "How Shares Are Priced" in the prospectus.

Equity securities generally are valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service when the Adviser believes such prices accurately reflect the fair market value of such securities. Securities that are traded on any stock exchange or on the NASDAQ over-the-counter market are generally valued by the pricing service at the last quoted sale price. Lacking a last sale price, an equity security is generally valued by the pricing service at its last bid price. When market quotations are not readily available, when the Adviser determines that the market quotation or the price provided by the pricing service does not accurately reflect the current market value, or when restricted or illiquid securities are being valued, such securities are valued as determined in good faith by the Adviser, in conformity with guidelines adopted by and subject to review of the Board of Trustees of the Trust.

Fixed income securities generally are valued by using market quotations, but may be valued on the basis of prices furnished by a pricing service when the Adviser believes such prices accurately reflect the fair market value of such securities. A pricing service utilizes electronic data processing techniques based on yield spreads relating to securities with similar characteristics to determine prices for normal institutional-size trading units of debt securities without regard to sale or bid prices. If the Adviser decides that a price provided by the pricing service does not accurately reflect the fair market value of the securities, when prices are not readily available from a pricing service, or when restricted or illiquid securities are being valued, securities are valued at fair value as determined in good faith by the Adviser, in conformity with guidelines adopted by and subject to review of the Board of Trustees. Short term investments in fixed income securities with maturities of less than 60 days when acquired, or which subsequently are within 60 days of maturity, are valued by using the amortized cost method of valuation, which the Board has determined will represent fair value.

REDEMPTION IN KIND

The Fund reserves the right to honor requests for redemption or repurchase orders made by a shareholder during any 90-day period by making payment in whole or in part in portfolio securities ("redemption in kind") if the amount of such a request is large enough to affect operations (if the request is greater than the lesser of \$250,000 or 1% of the Fund's net assets at the beginning of the 90-day period). The securities will be chosen by the Fund and valued using the same procedures as used in calculating the Fund's NAV. A shareholder will be exposed to market risk until these securities are converted to cash and may incur transaction expenses in converting these securities to cash. In the event that an in-kind distribution is made, a shareholder may incur additional expenses, such as the payment of brokerage commissions, on the sale or other disposition of the securities received from the Fund.

TAX STATUS

The following discussion is general in nature and should not be regarded as an exhaustive presentation of all possible tax ramifications. All shareholders should consult a qualified tax adviser regarding their investment in the Fund.

The Fund intends to qualify as regulated investment company under Subchapter M of the Internal Revenue Code, which requires compliance with certain requirements concerning the sources of its income, diversification of its assets, and the amount and timing of its distributions to shareholders. Such qualification does not involve supervision of management or investment practices or policies by any government agency or bureau. By so qualifying, the Fund should not be subject to federal income or excise tax on its net investment income or net capital gain, which are distributed to shareholders in accordance with the applicable timing requirements. Net investment income and net capital gain of the Fund will be computed in accordance with Section 852 of the Internal Revenue Code.

Net investment income is made up of dividends and interest less expenses. Net capital gain for a fiscal year is computed by taking into account any capital loss carryforward of the Fund. Capital losses incurred in tax years beginning after December 22, 2010 may now be carried forward indefinitely and retain the character of the original loss. Under previously enacted laws, capital losses could be carried forward to offset any capital gains only for eight years, and carried forward as short-term capital losses, irrespective of the character of the original loss. Capital loss carry forwards are available to offset future realized capital gains. To the extent that these carry forwards are used to offset future capital gains it is probable that the amount offset will not be distributed to shareholders. As of November 30, 2018, the CCA Aggressive Return Fund had no short-term capital loss carryforwards.

The Fund intends to distribute all of its net investment income, any excess of net short-term capital gains over net long-term capital losses, and any excess of net long-term capital gains over net short-term capital losses in accordance with the timing requirements imposed by the Internal Revenue Code and therefore should not be required to pay any federal income or excise taxes. Both types of distributions will be in shares of the Fund unless a shareholder elects to receive cash.

To be treated as a regulated investment company under Subchapter M of the Internal Revenue Code, the Fund must also (a) derive at least 90% of its gross income from dividends, interest, payments with respect to securities loans, net income from certain publicly traded partnerships and gains from the sale or other disposition of securities or foreign currencies, or other income (including, but not limited to, gains from options, futures or forward contracts) derived with respect to the business of investing in such securities or currencies, and (b) diversify its holdings so that, at the end of each fiscal quarter, (i) at least 50% of the market value of the Fund's assets is represented by cash, U.S. government securities and securities of other regulated investment companies, and other securities (for purposes of this calculation, generally limited in respect of any one issuer, to an amount not greater than 5% of the market value of the

Fund's assets and 10% of the outstanding voting securities of such issuer) and (ii) not more than 25% of the value of its assets is invested in the securities of (other than U.S. government securities or the securities of other regulated investment companies) any one issuer, two or more issuers which the Fund controls and which are determined to be engaged in the same or similar trades or businesses, or the securities of certain publicly traded partnerships.

If the Fund fails to qualify as a regulated investment company under Subchapter M in any fiscal year, it will be treated as a corporation for federal income tax purposes. As such, the Fund would be required to pay income taxes on its net investment income and net realized capital gains, if any, at the rates generally applicable to corporations. Shareholders of the Fund generally would not be liable for income tax on the Fund's net investment income or net realized capital gains in their individual capacities. Distributions to shareholders, whether from the Fund's net investment income or net realized capital gains, would be treated as taxable dividends to the extent of current or accumulated earnings and profits of the Fund.

The Fund is subject to a 4% nondeductible excise tax on certain undistributed amounts of ordinary income and capital gain under a prescribed formula contained in Section 4982 of the Internal Revenue Code. The formula requires payment to shareholders during a calendar year of distributions representing at least 98% of the Fund's ordinary income for the calendar year and at least 98.2% of its capital gain net income (i.e., the excess of its capital gains over capital losses) realized during the one-year period ending October 31 during such year plus 100% of any income that was neither distributed nor taxed to the Fund during the preceding calendar year. Under ordinary circumstances, the Fund expects to time their distributions so as to avoid liability for this tax.

The following discussion of tax consequences is for the general information of shareholders that are subject to tax. Shareholders that are IRAs or other qualified retirement plans are exempt from income taxation under the Internal Revenue Code.

Distributions of taxable net investment income and the excess of net short-term capital gain over net long-term capital loss are taxable to shareholders as ordinary income.

Distributions of net capital gain ("capital gain dividends") generally are taxable to shareholders as long-term capital gain, regardless of the length of time the shares of the Fund have been held by such shareholders.

Redemption of Fund shares by a shareholder will result in the recognition of taxable gain or loss in an amount equal to the difference between the amount realized and the shareholder's tax basis in his or her Fund shares. Such gain or loss is treated as a capital gain or loss if the shares are held as capital assets. However, any loss realized upon the redemption of shares within six months from the date of their purchase will be treated as a long-term capital loss to the extent of any amounts treated as capital gain dividends during such six-month period. All or a portion of any loss

realized upon the redemption of shares may be disallowed to the extent shares are purchased (including shares acquired by means of reinvested dividends) within 30 days before or after such redemption.

Distributions of taxable net investment income and net capital gain will be taxable as described above, whether received in additional cash or shares. Shareholders electing to receive distributions in the form of additional shares will have a cost basis for federal income tax purposes in each share so received equal to the net asset value of a share on the reinvestment date.

All distributions of taxable net investment income and net capital gain, whether received in shares or in cash, must be reported by each taxable shareholder on his or her federal income tax return. Dividends or distributions declared in October, November or December as of a record date in such a month, if any, will be deemed to have been received by shareholders on December 31, if paid during January of the following year. Redemptions of shares may result in tax consequences (gain or loss) to the shareholder and are also subject to these reporting requirements.

Under the Internal Revenue Code, the Fund will be required to report to the Internal Revenue Service all distributions of taxable income and capital gains as well as gross proceeds from the redemption or exchange of Fund shares, except in the case of certain exempt shareholders. Under the backup withholding provisions of Section 3406 of the Internal Revenue Code, distributions of taxable net investment income and net capital gain and proceeds from the redemption or exchange of the shares of a regulated investment company may be subject to withholding of federal income tax in the case of non-exempt shareholders who fail to furnish the investment company with their taxpayer identification numbers and with required certifications regarding their status under the federal income tax law, or if the Fund is notified by the IRS or a broker that withholding is required due to an incorrect TIN or a previous failure to report taxable interest or dividends. If the withholding provisions are applicable, any such distributions and proceeds, whether taken in cash or reinvested in additional shares, will be reduced by the amounts required to be withheld.

Payments to a shareholder that is either a foreign financial institution ("FFI") or a non-financial foreign entity ("NFFE") within the meaning of the Foreign Account Tax Compliance Act ("FATCA") may be subject to a generally nonrefundable 30% withholding tax on: (a) income dividends paid by the Fund after June 30, 2014 and (b) certain capital gain distributions and the proceeds arising from the sale of Fund shares paid by the Fund after December 31, 2016. FATCA withholding tax generally can be avoided: (a) by an FFI, subject to any applicable intergovernmental agreement or other exemption, if it enters into a valid agreement with the IRS to, among other requirements, report required information about certain direct and indirect ownership of foreign financial accounts held by U.S. persons with the FFI and (b) by an NFFE, if it: (i) certifies that it has no substantial U.S. persons as owners or (ii) if it does have such owners, reports information relating to them. The Fund may disclose the information that it receives from its shareholders to the IRS, non-U.S. taxing authorities or other parties as necessary to comply with FATCA. Withholding also may be required if a foreign

entity that is a shareholder of the Fund fails to provide the Fund with appropriate certifications or other documentation concerning its status under FATCA.

Options, Futures, Forward Contracts and Swap Agreements

To the extent such investments are permissible for the Fund, the Fund's transactions in options, futures contracts, hedging transactions, forward contracts, straddles and foreign currencies will be subject to special tax rules (including mark-to-market, constructive sale, straddle, wash sale and short sale rules), the effect of which may be to accelerate income to the Fund defer losses to the Fund cause adjustments in the holding periods of the Fund's securities, convert long-term capital gains into short-term capital gains and convert short-term capital losses into long-term capital losses. These rules could therefore affect the amount, timing and character of distributions to shareholders.

To the extent such investments are permissible, certain of the Fund's hedging activities (including its transactions, if any, in foreign currencies or foreign currency-denominated instruments) are likely to produce a difference between its book income and its taxable income. If the Fund's book income exceeds its taxable income, the distribution (if any) of such excess book income will be treated as (i) a dividend to the extent of the Fund's remaining earnings and profits (including earnings and profits arising from tax-exempt income), (ii) thereafter, as a return of capital to the extent of the recipient's basis in the shares, and (iii) thereafter, as gain from the sale or exchange of a capital asset. If the Fund's book income is less than taxable income, the Fund could be required to make distributions exceeding book income to qualify as a regular investment company that is accorded special tax treatment.

Passive Foreign Investment Companies

Investment by the Fund in certain "passive foreign investment companies" ("PFICs") could subject the Fund to a U.S. federal income tax (including interest charges) on distributions received from the company or on proceeds received from the disposition of shares in the company, which tax cannot be eliminated by making distributions to Fund shareholders. However, the Fund may elect to treat a PFIC as a "qualified electing fund" ("QEF election"), in which case the Fund will be required to include its share of the company's income and net capital gains annually, regardless of whether they receives any distribution from the company.

The Fund also may make an election to mark the gains (and to a limited extent losses) in such holdings "to the market" as though it had sold and repurchased its holdings in those PFICs on the last day of the Fund's taxable year. Such gains and losses are treated as ordinary income and loss. The QEF and mark-to-market elections may accelerate the recognition of income (without the receipt of cash) and increase the amount required to be distributed for the Fund to avoid taxation. Making either of these elections therefore may require the Fund to liquidate other investments (including when it is not advantageous to do so) to meet its distribution requirement, which also may accelerate the recognition of gain and affect the Fund's total return.

Foreign Currency Transactions

The Fund's transactions in foreign currencies, foreign currency-denominated debt securities and certain foreign currency options (and similar instruments) may give rise to ordinary income or loss to the extent such income or loss results from fluctuations in the value of the foreign currency concerned.

Foreign Taxation

Income received by the Fund from sources within foreign countries may be subject to withholding and other taxes imposed by such countries. Tax treaties and conventions between certain countries and the U.S. may reduce or eliminate such taxes. If more than 50% of the value of a Fund's total assets at the close of its taxable year consists of securities of foreign corporations, the Fund may be able to elect to "pass through" to the Fund's shareholders the amount of eligible foreign income and similar taxes paid by the Fund. If this election is made, a shareholder generally subject to tax will be required to include in gross income (in addition to taxable dividends actually received) his or her pro rata share of the foreign taxes paid by the Fund, and may be entitled either to deduct (as an itemized deduction) his or her pro rata share of foreign taxes in computing his or her taxable income or to use it as a foreign tax credit against his or her U.S. federal income tax liability, subject to certain limitations. In particular, a shareholder must hold his or her shares (without protection from risk of loss) on the ex-dividend date and for at least 15 more days during the 30-day period surrounding the ex-dividend date to be eligible to claim a foreign tax credit with respect to a gain dividend. No deduction for foreign taxes may be claimed by a shareholder who does not itemize deductions. Each shareholder will be notified within 60 days after the close of the Fund's taxable year whether the foreign taxes paid by the Fund will "pass through" for that year.

Generally, a credit for foreign taxes is subject to the limitation that it may not exceed the shareholder's U.S. tax attributable to his or her total foreign source taxable income. For this purpose, if the pass-through election is made, the source of the Fund's income will flow through to shareholders of the Fund. With respect to the Fund, gains from the sale of securities will be treated as derived from U.S. sources and certain currency fluctuation gains, including fluctuation gains from foreign currency-denominated debt securities, receivables and payables will be treated as ordinary income derived from U.S. sources. The limitation on the foreign tax credit is applied separately to foreign source passive income, and to certain other types of income. A shareholder may be unable to claim a credit for the full amount of his or her proportionate share of the foreign taxes paid by the Fund. The foreign tax credit can be used to offset only 90% of the revised alternative minimum tax imposed on corporations and individuals and foreign taxes generally are not deductible in computing alternative minimum taxable income.

Original Issue Discount and Pay-In-Kind Securities

Current federal tax law requires the holder of a U.S. Treasury or other fixed income zero coupon security to accrue as income each year a portion of the discount at which the security was purchased, even though the holder receives no interest payment in cash on the security during the year. In addition, pay-in-kind securities will give rise to income which is required to be distributed and is taxable even though the Fund holding the security receives no interest payment in cash on the security during the year.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund may be treated as debt securities that are issued originally at a discount. Generally, the amount of the original issue discount ("OID") is treated as interest income and is included in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. A portion of the OID includable in income with respect to certain high-yield corporate debt securities (including certain pay-in-kind securities) may be treated as a dividend for U.S. federal income tax purposes.

Some of the debt securities (with a fixed maturity date of more than one year from the date of issuance) that may be acquired by the Fund in the secondary market may be treated as having market discount. Generally, any gain recognized on the disposition of, and any partial payment of principal on, a debt security having market discount is treated as ordinary income to the extent the gain, or principal payment, does not exceed the "accrued market discount" on such debt security. Market discount generally accrues in equal daily installments. The Fund may make one or more of the elections applicable to debt securities having market discount, which could affect the character and timing of recognition of income.

Some debt securities (with a fixed maturity date of one year or less from the date of issuance) that may be acquired by the Fund may be treated as having acquisition discount, or OID in the case of certain types of debt securities. Generally, the Fund will be required to include the acquisition discount, or OID, in income over the term of the debt security, even though payment of that amount is not received until a later time, usually when the debt security matures. The Fund may make one or more of the elections applicable to debt securities having acquisition discount, or OID, which could affect the character and timing of recognition of income.

A fund that holds the foregoing kinds of securities may be required to pay out as an income distribution each year an amount, which is greater than the total amount of cash interest the Fund actually received. Such distributions may be made from the cash assets of the Fund or by liquidation of portfolio securities, if necessary (including when it is not advantageous to do so). The Fund may realize gains or losses from such liquidations. In the event the Fund realizes net capital gains from such transactions, its shareholders may receive a larger capital gain distribution, if any, than they would in the absence of such transactions.

Shareholders of the Fund may be subject to state and local taxes on distributions received from the Fund and on redemptions of the Fund's shares.

A brief explanation of the form and character of the distribution accompany each distribution. In January of each year the Fund issues to each shareholder a statement of the federal income tax status of all distributions.

Shareholders should consult their tax advisers about the application of federal, state and local and foreign tax law in light of their particular situation.

PROXY VOTING POLICIES AND PROCEDURES

The Board of Trustees of the Trust has delegated responsibilities for decisions regarding proxy voting for securities held by the Fund to the Adviser or its designee. The Adviser or its designee will vote such proxies in accordance with its proxy policies and procedures. In some instances, the Adviser or its designee may be asked to cast a proxy vote that presents a conflict between the interests of the Fund's shareholders, and those of the Adviser or its designee or an affiliated person of the Adviser or its designee. In such a case, the Trust's policy requires that the Adviser or its designee abstain from making a voting decision and to forward all necessary proxy voting materials to the Trust to enable the Board of Trustees to make a voting decision. The Adviser or its designee shall make a written recommendation of the voting decision to the Board of Trustees, which shall include: (i) an explanation of why it has a conflict of interest; (ii) the reasons for its recommendation; and (iii) an explanation of why the recommendation is consistent with the Adviser's proxy voting policies. The Board of Trustees shall make the proxy voting decision that, in its judgment, after reviewing the recommendation of the Adviser or its designee, is most consistent with the Adviser's or its designee's proxy voting policies and in the best interests of Fund's shareholders. When the Board of Trustees of the Trust is required to make a proxy voting decision, only the Trustees without a conflict of interest with regard to the security in question or the matter to be voted upon shall be permitted to participate in the decision of how the Fund's vote will be cast. A summary of the Adviser's proxy voting policies and procedures are attached as Appendix A.

MORE INFORMATION. The actual voting records relating to portfolio securities during the most recent 12-month period ended June 30 will be available without charge, upon request, by calling toll free, 1-800-595-4866. You can obtain a copy of the Fund's semi-annual report and annual report without charge by calling the Fund at 1-800-595-4866.

Appendix A

PROXY VOTING POLICY OF THE ADVISER

The Board of Trustees has adopted proxy voting procedures that delegate to the Adviser of the Fund (Checchi Capital Advisers, LLC) the authority to vote proxies, subject to the supervision of the Board of Trustees. In addition, the Board of Trustees authorized Checchi Capital Advisers, LLC to retain a third party voting service to provide recommendations on proxy votes or vote proxies on the Fund's behalf. The Trust's proxy voting procedures provide that, in the event of a conflict between the interests of Checchi Capital Advisers, LLC and the Fund with regard to a proxy vote, a majority of the Independent Trustees will be responsible for resolving the conflict.

Checchi Capital Advisers, LLC, subject to oversight by the Board of Trustees, seeks to ensure that all voting decisions, particularly those that may involve a potential conflict of interest with the Fund's principal underwriter or any affiliated person of the Fund, are made consistent with Checchi Capital Advisers, LLC's fiduciary duty to the Fund and its shareholders.

Checchi Capital Advisers, LLC votes proxies in a manner designed to maximize the value of the Fund's investment. Checchi Capital Advisers, LLC generally votes in accordance with management's recommendations. If Checchi Capital Advisers, LLC believes management is not acting on behalf of the best interests of the Fund and its shareholders, Checchi Capital Advisers, LLC will not vote with management. When voting, the following factors are taken into consideration:

- the period of time over which the voting shares of the Fund are expected to be held;
- the size of the position;
- the costs involved in the proxy proposal;
- the existing governance documents of the affected company; and
- the affected company's management and operations.

For investments made by the Fund in investment companies, including ETFs, pursuant to Section 12(d)(1)(F), the Fund must comply with the following voting restrictions: when a Fund exercises voting rights, by proxy or otherwise, with respect to investment companies owned by the Fund, the Fund will either seek instruction from the Fund's shareholders with regard to the voting of all proxies and vote in accordance with such instructions, or vote the shares held by the Fund in the same proportion as the vote of all other holders of such security.

Information regarding how the Fund voted proxies relating to portfolio securities during the most recent 12 month period ended June 30 is available without charge, upon request by calling toll-free, 1-800-595-4866 and by accessing the SEC's website at www.sec.gov. The Fund will send a description of their proxy voting policies and procedures within three business days of receipt of a request.
